

PRINCE2 Agile® Practitioner Training

Duration: 2 Days

Course Content:

PRINCE2 Agile Practitioner Training flawlessly puts together the Agile methodologies with the world's most preferred approach to project management, making it a complete project management solution. PRINCE2 Agile Practitioner Training combines flexibility with pragmatism, and it is also corporate-friendly, which makes it perfect for both worlds. This technical course prepares and guides you to blend governance, structure, and control with the agile approaches, methods, and techniques. Any individual with the PRINCE2 Agile Practitioner Training can manage and deliver a project on time.

It is aimed at individuals functioning within a project environment, including all the managerial professionals and the staff conducting the integration of project management with project delivery. Professionals with governance responsibilities for projects utilizing agile delivery methods can benefit from learning and understanding the agile concepts demonstrated in PRINCE2 Agile. This training program also helps you display the competitive ability to use the best approaches to execute any project.

Steps to become a certified
