Microtek Learning
Redefining The Skills

Microtek Learning's Purpose is to Enhance Your Knowledge Today for a Better Tomorrow

We Transform Your Career By Empowering Your Skills.

We are the leading training provider, helping professionals from different industries and sectors develop new skills and eliminate the skill gap to gain recognition and grow globally. We intend to deliver high-value training via practical and innovative approaches. Microtek Learning is one of the most trusted IT training organizations globally. We have headquarters in the USA, Canada, and India. Our vision is to empower the world through education.

Our prices are figured using a Cost-Plus model. Country-wise price is adjusted as per the PPP - Purchasing Power Parity.

The company's founders are passionate entrepreneurs who noticed the need to full-fill a gap in the IT training industry for professionals. They're helped in their goal by industry specialists who conduct workshops, igniting brains and propelling professionals to face on-the-job obstacles.

Our Motto for Corporate Training

Microtek Learning offers many authorized training programs to enable prospective IT professional to keep up with the industry's ever-changing technologies and help them continue their professional development. Our corporate training was created with this in mind.

We can provide you with customized solutions for all your training requirements—organizations seeking consultancy or training services to improve worker performance and promote business success. Businesses have benefited from our expertise in bridging the knowledge and talent gap.

Microsoft Azure

AZ-900T00: Microsoft Azure Fundamentals Training

AZ-900T00: Microsoft Azure Fundamentals Training is developed to help professionals gain foundational knowledge on core Azure services, cloud concepts, security, compliance, privacy, and trust. This technical course provides comprehensive information regarding different types of cloud models and services.

AI-900T00: Microsoft Azure AI Fundamentals Training

This technical course helps in gaining important knowledge and skills needed for developing Azure AI solutions by creating a customer support chatbot by using AI from the MS Azure platform, which includes pre-built functionality and language understanding in the Azure Cognitive Services.

DP-900: Microsoft Azure Data Fundamentals Training

Exposure to this course brings professionals the fundamental knowledge of core data concepts. Professionals will learn the database concept in a cloud environment. Achieving this program helps professionals to acquire all the basic skills in cloud data services.

DP-080: Querying Data with Microsoft Transact-SQL Training

DP-080: Querying Data with Microsoft Transact-SQL training program that intends for all SQL Server database administrators, system engineers, and developers. This curriculum is for those who wish to enhance their skills and knowledge in writing down the queries.

AZ-720T00: Azure Support Engineer Troubleshooting Azure Connectivity Training

When you have cloud-based assets, networking is especially important. The various connectivity problems that a network engineer could frequently run across are covered in this course, along with the troubleshooting techniques to fix them.

SC-900: Microsoft Security, Compliance, & Identity Fundamentals Training

Microsoft Security, Compliance, & Identity Fundamentals training course intends for all those professionals looking to learn about the basics of security compliance and identity concepts.

AZ-305T00: Designing Microsoft Azure Infrastructure Solutions Training

The topics covered in this training cover governance, storage, application architecture, data integration, computing, network, identity & authentication, business continuity, high availability, and migrations.

AZ-104T00: Microsoft Azure Administrator Training

AZ-104T00: Microsoft Azure Administrator Training is designed to teach IT professionals the right methodologies to manage their Azure subscriptions, implement storage solutions, build, and scale digital machines, and configure digital networking.

AZ-500T00: Microsoft Azure Security Technologies Associate (Security Engineer) Training

AZ-500T00: Microsoft Azure Security Technologies Associate (Security Engineer) Training is aimed at professionals to help them gain the skills and knowledge required to maintain the security posture, implement security control and recognize and remediate vulnerabilities with the help of various security tools.

AZ-400: Microsoft Azure Devops Solution Training

This technical course provides comprehensive information on various elements, including dependency management, implementing continuous feedback, and application infrastructure.

AZ-204T00: Developing solutions for Microsoft Azure Training

This technical course teaches them the techniques to create Azure functions, implement Azure compute solutions, and develop solutions with Azure storage.

AI-050T00: Develop Generative AI Solutions with Azure OpenAI Service Training

The AI-050T00 training is your entry point into Azure's powerful AI offering, allowing you to explore the seemingly endless opportunities of generative AI solutions. Our training is made to accommodate students of all levels of competence, whether you are a beginning AI enthusiast or an experienced professional wishing to enhance your skill set.

DP-100T01: Designing and Implementing a Data Science Solution on Azure Training

This technical course enhances and supports one's current knowledge of machine learning and Python to manage data preparations and ingestions, model training, and launch machine learning solution inspection in Microsoft Azure.

DP-300: Administering Relational Databases on Microsoft Azure Training

Database management has turned out a significant requirement for companies around the globe. Hence, those aspiring for the position of database management specialist and database administrator go for authentic certifications.

AI-102: Designing & Implementing a Microsoft Azure AI Solution Training

Microsoft Azure AI Solution is a great course that is intended for all software developers. For any professional who wants to create an AI application, designing and implementing a Microsoft Azure AI solution is the course they need.

DP-203: Data Engineering on Microsoft Azure Training

DP-203: Data Engineering on Microsoft Azure course is intended for all data engineers. All the professionals who want to learn this course must also have the subject matter expertise.

DP-050T00: Migrate SQL Workloads to Azure Training

This technical course provides comprehensive information on each level of the data platform modernization process. Individuals will develop a better understanding of the available migration tools and how they are suitable for every level of the data migration process.

DP-060T00: Migrate NoSQL workloads to Azure Cosmos DB Training

DP-060T00: Migrate NoSQL workloads to Azure Cosmos DB training is designed to help professionals develop a better understanding of Cosmos DB. It teaches the right methodologies to migrate Cassandra and MongoDB workloads to Cosmo DB.

DP-070: Migrate Open Source Data Workloads to Azure Training

This training qualifies the individual to learn Azure SQL Database and trains them on migrating MySQL and PostgreSQL workloads to SQL Database. This course is based on the objectives of the course version DP-070T00-A.

552241: Microsoft Azure Big Data Analytics Solutions Training

552241: Microsoft Azure Big Data Analytics Solutions Training is aimed at professionals to enhance their knowledge about developing big data analytic solutions on Microsoft Azure.

552242: Operationalize Cloud Analytics Solutions with Microsoft Azure Training

552242: Operationalize Cloud Analytics Solutions with Microsoft Azure Training helps professionals evolve their knowledge about building big data analytics solutions on Microsoft Azure to the next level.

55247: Designing and Implementing Cloud Data Platform Solutions Training

55247: Designing and Implementing Cloud Data Platform Solutions Training is designed to help professionals develop a conceptual understanding of designing and implementing database solutions on Microsoft Azure and SQL Server.

AZ-120T00: Planning and Administering Microsoft Azure for SAP Workloads Training

AZ-120T00: Planning and Administering Microsoft Azure for SAP Workloads Training guide IT professionals to leverage Azure resources that incorporate configuration and deployment of digital machines, digital networks, Azure AD, and storage accounts.

MS-203: Microsoft 365 Messaging Training

The key elements of this course include Microsoft 365 Messaging administration. It includes massaging transport and mail flow. Professionals will learn about messaging security, hygiene, compliances in messaging, infrastructure in messaging, and hybrid messaging.

SC-200: Microsoft Security Operations Analyst Training

Microsoft Security Operations Analyst training is a great course that is intended for all security engineers. In the course, the Microsoft security operations analysts amalgamate with the original stakeholder to develop secure IT systems for any firm.

SC-300: Microsoft Identity & Access Administrator Training

SC-300: Microsoft Identity & Access Administrator training course is for all the identity and access administrators willing to take the associated certification exam. The professionals who are already performing the identity and access administration task need this course.

AZ-800T00: Administering Windows Server Hybrid Core Infrastructure Training

This Administering Windows Server Hybrid Core Infrastructure Training will help professionals understand and manage services utilizing Windows Server workloads on-premises, cloud, and hybrid technologies.

AZ-140: Configuring and Operating Microsoft Azure Virtual Desktop Training

Configuring and Operating Microsoft Azure Virtual Desktop training helps Azure administrators to understand how to plan, manage and deliver virtual desktop experiences and remote apps for any device on Azure.

DP-420T00: Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Training

The Cloud-Native Application Using Microsoft Cosmos DB training course help you understand how to build an application with the SQL API & SDK for Cosmos DB Azure.

MB-260T00: Microsoft Customer Data Platform Specialty Training

The customer Data Platform Specialists Training course helps you implement solutions that give you insight into the profile of customers and enable you to track engagement activities to enhance the experience of the customer and grow customer retention.

SharePoint

55066: PowerShell for SharePoint Administrators Training

After completing this one-day instructor-led course, professionals will be equipped with the skills needed to manage SharePoint servers using PowerShell.

55095: SharePoint 2010 and 2013 Auditing and Site Content Administration using PowerShell Training

This one-day training is designed for auditors and server administrators of SharePoint 2010 and 2013 who must query virtually every aspect of SharePoint.

55261: SharePoint for Office 365 Site Owner Training

The two-day course covers SharePoint site owner-related topics and gives both fundamental and advanced walkthroughs to make students familiar with Office 365 in a SharePoint environment.

55262: Introduction to SharePoint for Office 365 Training

The one-day class introduces students to Office 365 in a SharePoint environment. This course is the shortened version of our full-fledged Office 365 in a SharePoint environment.

55281: SharePoint Online Branding Training

This branding course will guide you on using the non-code options and advice on where to look for the resources. This course will not cover writing the code for non-standard customizations.

55157: SharePoint 2016 Business Intelligence Training

In this course, we focus on teaching services and features of SharePoint offering support to Business Intelligence scenarios.

55193: Introduction to SharePoint 2016 for Collaboration And Document Management Training

The one-day Microtek learning class is created for team members of SharePoint as well as end-users wanting to learn how to use Microsoft SharePoint 2016's document management, team collaboration and social features.

55197: Microsoft SharePoint Server 2016 for the Site Owner/Power User Training

The 2-day course by Microtek Learning is meant for power users and information workers serving as Site Collection Admins or SharePoint Site Owners as well as students wanting to learn how to manage team collaboration, document, and Microsoft SharePoint 2016 social features.

55199: SharePoint 2016 End User Training

SharePoint 2016 End User Training is developed for Individuals working with SharePoint 2016 Environment. The course highlights the basics of SharePoint including working with libraries and lists and basic customization of pages.

55200: SharePoint 2016 Power User Training

The course is meant for individuals needing to learn the Fundamentals of the SharePoint sites to manage them. Existing SharePoint Power users or IT workers who have been working with SharePoint for some time are the ideal candidates to take the course.

55234: SharePoint 2016 Site Collections And Site Owner Administration Training

55234: SharePoint 2016 Site Collections and Site Owner Administration Training contains comprehensive knowledge and a detailed explanation of the skills required to become an administrator for SharePoint sites and site collections

55048: No-Code SharePoint 2013-2016 Workflows With SharePoint Designer 2013 Training

This program offered by Microtek Learning is aimed at the Collection Admins Developers, and Power Users seeking to learn the workflow development process using the SharePoint 2013 Designer, Visio, and Visual Designer

55198: Microsoft SharePoint Server Content Management for SharePoint 2013 and 2016 Training

The two-day class led by instructors at Microtek Learning is intended for SharePoint site and Content Owners. This course prepares the student to configure and use the Library content management functions of SharePoint.

55251: SharePoint 2016 Site Owner Training

The instructor-led two-day course is targeted towards site owners and managers looking to get knowledge in the newly introduced SharePoint 2016.

55252: Introduction to SharePoint 2016 Training

This course is a brief version of SharePoint End User's complete courses and is for users new or a little familiar with SharePoint but are not responsible for SharePoint site management.

55299: SharePoint 2019 Site Owner Training

You gain practical expertise with SharePoint Site Owner tasks through this training. Building and managing team sites, producing and modifying material, fusing Excel and Outlook, and controlling permissions are all things you may practice.

55217: SharePoint 2016 Power User Training

On learning this course, professionals will indulge themself in knowing everything about the site owner's story. The course will boost the confidence in the professional to plan and develop new sites.

55238: SharePoint Online for Administrators Training

55238: SharePoint Online for the Administrators' training program is intended for administrators who want to set up, configure and manage Sharepoint virtually. This course will help professionals grasp the knowledge of SharePoint online administration in office 365.

55215: SharePoint Online Power User Training

55215: SharePoint Online Power User training program intends for all Sharepoint users who want to make full use of it online. The course is composed so that it offers a complete story to the site owner from scratch to the end.

50354: SharePoint 2010 SharePoint Designer Training

This two-day instructor-led training covers the new Ribbon interface's navigation and usage, as well as what new Designer features are available, changes to workflow actions and conditions, how to create external content types, and how to alter Out of the Box workflow.

55028: SharePoint 2013 Power User Training

SharePoint 2013 Power User training course is for the professionals who want to learn the fundamentals of managing SharePoint sites.

55072: Visualizing Data with SharePoint 2013, Report Builder, PowerPivot & PowerView with NO CODE Training

The goal of this course is to give participants an opportunity to learn about and experiment with Microsoft's data visualization tools while also developing their awareness of what is possible without the use of code. PowerView, PowerPivot, Report Builder, PerformancePoint, Excel Services, and SharePoint 2013 are all covered and merged into dashboards. Of course, this is a better version of 50561AC.

55249: Developing with the SharePoint Framework Training

This SharePoint five-day instructor-led training course is designed for developers. Who needs to create client-side solutions with SharePoint Framework?

55286: SharePoint 2019 Power User Training

SharePoint 2019 Power User training gives the complete site owner story from start to finish engagingly and practices to ensure you have the confidence to plan and create new sites or manage your existing sites.

55293: SharePoint End User 2019 Training

SharePoint 2019 End User training is for end-users and site owners/managers new to working in a SharePoint 2019 environment. Professionals will learn the basics of working with lists and libraries, basic page customization, working with forms, and managing site permissions and users.

55294: SharePoint Power User 2019 Training

SharePoint 2019 Power User training is intended for those who want to learn the fundamentals of managing SharePoint sites.

55298: Introduction to SharePoint 2019 Training

SharePoint 2019 Introduction training is for end-users working in a SharePoint environment. It is an abbreviated version of our complete SharePoint End User class.

55370: SharePoint Online Management and Administration Training

55370A - SharePoint Online Management and Administration are equivalent to Microsoft's retired course 20331 – Administering SharePoint Online.

55311: SharePoint Server SE for Power Users Training

This 4-day training gives you the confidence to plan and develop new sites or handle your existing sites in SharePoint Server Subscription Edition by providing the entire site owner story from beginning to end in a compelling and useful way.

55355: SharePoint 2016 Administration Training

These administrators should either be new to SharePoint Server Administration or be upgrading from a previous version of SharePoint, such as SharePoint 2007, 2010, or 2013.

55255: SharePoint for Office 365 End User Training

For end users and site owners/managers who have never worked in a SharePoint environment in Office 365, this three-day instructor-led training course is available.

55220: Nintex Forms and Mobile Training

This one-day instructor-led training will teach you how to create forms for use with Nintex Workflow 2013 and SharePoint 2013 using Nintex Forms and Nintex Mobile.

55216: SharePoint 2013 Power User Training

This course gives you the confidence to plan and develop new sites or maintain your existing sites by telling the entire site owner story from beginning to end in an interesting and useful way.

55158: SharePoint 2013 Business Intelligence Training

The services and functionalities of SharePoint that support business intelligence scenarios are covered in this course.

50478: SharePoint 2010 Advanced Foundation Development Training

This five-day, instructor-led, group-paced, classroom-delivery learning format includes pre-planned, practical exercises.

55033: SharePoint 2013 Site Collection and Site Administration Training

Power users who must operate in the SharePoint 2013 environment are the target audience for this five-day instructor-led course.

55035: Microsoft SharePoint Server 2013 for the Site Owner/Power User Training

This course is recommended for students who need to learn how to administer the social, document, and team collaboration aspects of Microsoft SharePoint 2013 sites.

55103: Creating and Sharing Interactive Dashboards with PowerPivot, Power View and SharePoint Server Training

Students will learn how to use Excel PowerPivot, Power View, and SharePoint to develop and share dynamic dashboards during this two-day instructor-led training.

50064: Advanced SharePoint Development Training

The primary focus of this course is on the core building elements of Windows SharePoint Services 3.0 (WSS), such as features, site pages, application pages, Web Parts, site columns, custom list types, custom workflows, content kinds, and site definitions.

55031: SharePoint 2013 End User Training

For end users operating in a SharePoint 2013 environment, there is a class called SharePoint 2013 End User. Basic SharePoint skills like using lists and libraries and customizing pages are covered in the course.

Microsoft SQL Server

55316: Administering a SQL Database Training

This Administering a SQL Database is a five-day training course that will help you understand how to maintain and administer Azure SQL Database, SQL Server, and cloud-based SQL.

55315: Introduction to SQL Databases Training

This Introduction to SQL Databases training is a three-day instructor-led training course. It is for students who want to start their database profession or whose current job is growing to contain database elements. This course covers all the fundamentals concept of databases like database languages, database types, and database designs.

DP-080: Querying Data with Microsoft Transact-SQL Training

DP-080: Querying Data with Microsoft Transact-SQL training program that intends for all SQL Server database administrators, system engineers, and developers. This curriculum is for those who wish to enhance their skills and knowledge in writing down the queries.

55317: Querying Microsoft SQL Server Training

This three-day course teaches students how to use basic Transact-SQL statements and other languages to query modern editions of Microsoft SQL Server and Azure SQL Server.

55170: Writing Reports with Report Designer and SSRS 2016 Training

The two-day course allows students to continue learning the foundations of writing reports using SSRS and Report Designer of SQL Server.

55246: SQL Always On High Availability with SQL 2016 Training

The instructor-led course is created for Windows engineers and database admins to make them familiarize with Always on High Availability concepts.

55321: SQL Server Integration Services Training

This five-day instructor-led course's objective is to teach IT professionals how to build, deploy, safeguard, and manage Integration Services projects and packages in addition to how to use SSIS to transform, extract, and load data into and out of SQL Server.

55369: Provisioning Databases on SQL Server Training

This five-day instructor-led course is intended for IT professionals who are interested in expanding their knowledge base and technical skills about SQL Server.

55123: Writing Reports with Report Builder and SSRS Level 1 Training

In this two-day course for students, the fundamentals of report writing using Microsoft® SQL Server® Report Builder and SSRS will once again be taught.

55073: Master Data Services, Data Quality Services with SQL 2012 -2014 and Excel Training

According to studies, data ages at a rate of 2% per month. All companies must rely on accurate information and make sure that data consistency and integrity are maintained across all applications.

55144: SQL Server 2014 Performance Tuning and Optimization Training

This course is created to provide you with the ideal amount of internal knowledge as well as a variety of real-world tuning and optimization methods.

55128: Writing Reports with Report Builder and SSRS Level 2 Training

This course focuses on constructing parameter reports, custom reports utilizing the list data region, complicated expressions for formatting and analysis, images and subreports added to reports, drill-down and drill-through features created, and sparklines, data bars, and indicators added to reports.

Windows Server

55343: Networking with Windows Server Training

This Networking with Windows Server training is a five-day training course. It gives you the knowledge of basic networking skills that are needed to support and deploy Windows Server in almost every organization.

55324: Installation, Storage and Compute with Windows Server 2016 Training

This instructor-led 5-day training course is for Informational Technology Professionals with fundamental knowledge of Windows Server.

55351: Identity with Windows Server Training

This five-day instructor-led is intended for IT professionals who wants to learn about administering, configuring, troubleshooting, and operating identity services in the Active Directory Domain Services and Azure AD.

55318: Advanced Automated Administration with Windows PowerShell Training

55318A is the updated version of the retired legacy MOC course 10962C. This three-day course teaches students how to automate administrative tasks using PowerShell.

55021: Configuring and Administering Hyper-V in Windows Server 2012 Training

This Hyper-V Windows Server 2012 training is a three-day instructor-led training that gives professionals the knowledge and skills to configure and administer Hyper-V in Windows Server 2012.

50255: Managing Windows Environments with Group Policy Training

In this Managing Windows Environments with Group Policy training, professionals will understand how to reduce costs, increase efficiencies in your network, consolidate the administration of an enterprise IT infrastructure, and manage computer systems and domain users running Windows Server and clients.

55078: Mobile Device Management Training

This Mobile Device Management training is a two-day instructor-led training. It is intended for IT professionals responsible for developing a management strategy for mobile devices in the enterprise.

AZ-800T00: Administering Windows Server Hybrid Core Infrastructure Training

This Administering Windows Server Hybrid Core Infrastructure Training will help professionals understand and manage services utilizing Windows Server workloads on-premises, cloud, and hybrid technologies.

AZ-801T00: Configuring Windows Server Hybrid Advanced Services Training

This configuring Windows Server Hybrid Advanced Services Training will guide you to manage Windows Server services with hybrid, on-premises, and cloud technologies.

Skype For Business

55070: Microsoft Lync 2013 Depth Support Engineer Training

This depth support engineer training is a five-day instructor-led training to support engineers beyond design and deployment to troubleshooting. Professionals will review Lync Server architecture from a Depth Support Engineer's viewpoint to support customers with Lync Server service problems.

55133: PowerShell for System Center Configuration Manager Administrators Training

The course provides students with insights to effectively access PowerShell cmdlets incorporated with SCCM 1802 and utilize the cmdlets to execute the primary site's configuration task.

Microsoft Windows

55032: Getting Started with Windows 8 Training

This Windows 8 training is a one-day instructor-led training designed for all end-users who want to learn how to use the newest features and functionality in the Windows 8 system.

50560: Windows 7 Essentials: Usability, Security, and Manageability Training

This Windows 7 is a one-day instructor-led training that helps professionals with the knowledge and skills to navigate Windows 7 and perform end-user-level tasks.

50292: Administering and Maintaining Windows 7 Training

This Maintaining Windows 7 training is a five-day instructor-led training that helps you with the knowledge and skills to install, maintain, and troubleshooting Windows 7 computers successfully.

50322: Configuring and Administering Windows 7 Training

With this Administering Windows 7 training course, professionals will understand the knowledge and skills to configure and administer Microsoft Windows 7 as a standalone installation or in a corporate environment as a part of a Windows Active Directory domain.

50331: Windows Client, Enterprise Support Technician Training

Windows Client, Enterprise Support Technician training course is a three-day instructor-led course that gives you the knowledge and skills needed to document, isolate and resolve issues on Windows Desktops on a corporate domain.

Visual Studio

55118: Creating SAP Crystal Reports with Visual Studio for Developers Training

This Visual Studio training is a two-day instructor-led training designed for application developers interested in improving client-side reports in Visual Studio 2013.

55172: Managing Development with Team Foundation Server 2015 Training

This two-day instructor-led is designed for application developers and application development managers interested in utilizing Visual Studio Team Foundation Server 2015 to achieve development projects.

55340: Developing ASP.NET Core Web Applications Training

In this 5-day course, professional web developers will learn to develop advanced ASP.NET Core applications using .NET tools and technologies.

55339: Programming in C# Training

This five-day training course teaches developers the programming skills that are required for developers to create Windows applications using the C# language.

55337: Introduction to Programming Training

In this 5-day course, students will learn the basics of computer programming through the use of Microsoft Visual Studio 2022 and the Visual C# and Visual Basic programming languages.

55319: HTML5 and CSS Training

This HTML5 and CSS training is a 5-day training course. It will help you understand the hands-on study of HTML5, CSS, and modern web and mobile development.

System Center

55313: Administering Configuration Manager, Part I: Fundamentals and Asset Management Training

This three-day, instructor-led course is the first of a two-part Community Courseware replacement for 20703-1.

Power BI

PL-900T00: Microsoft Power Platform Fundamentals Training

PL-900T00: Microsoft Power Platform Fundamentals Training provides comprehensive knowledge and an in-depth explanation of the product capabilities and business value of Power Platform.

PL-100: Microsoft Power Platform App Maker Training

This course is designed exclusively for IT professionals. It will help professionals learn how to build an app with low-code techniques. By obtaining this course, professionals will make apps to automate and transform the business.

PL-300T00: Power BI Data Analyst Training

This PL-300 Microsoft Power BI Data Analyst training course will help you learn the diverse methods and most promising practices in line with technical and business requirements for analyzing, modeling, and visualizing data with Microsoft Power BI.

55232: Writing Analytical Queries for Business Intelligence Training

This course presents TSQL within the data analysis context to be specific, creating purpose using data rather than developing transaction-oriented data-tier applications.

DP-500T00: Designing and Implementing Enterprise-Scale Analytics Solutions Using Microsoft Azure and Microsoft Power BI Training

This DP-500T00: Designing and Implementing Enterprise-Scale Analytics Solutions Using Microsoft Azure and Microsoft Power BI course covers methods and practices for performing advanced data analytics at scale.

55163: Preparing Your Data for Power BI Training

The course introduces Learners to SQL BISM (Business Intelligence Semantic Model) Tabular model, DAX and data modelling.

55164: Quick Powerful Graphics with Power View, PowerPivot, Power Query, Power Map and Power BI Training

The course is developed to teach participants the process of combining the functionality of Power Query, PowerPivot, Power View, and Power BI into Charts, graphs, reports, KPIs, and other visual information to use in a business environment.

PowerShell

55133: PowerShell for System Center Configuration Manager Administrators Training

The course provides students with insights to effectively access PowerShell cmdlets incorporated with SCCM 1802 and utilize the cmdlets to execute the primary site's configuration task.

55039: Windows PowerShell Scripting And Toolmaking Training

The five-day course is designed for IT professionals interested in updating their industry-relevant skills in PowerShell as well as administrative automation.

50414: Microsoft Windows PowerShell V2 for Administrators Training

The instructor-led four-day course offers learners with skills and knowledge to leverage PowerShell V2 to administer a Windows environment.

55066: PowerShell for SharePoint Administrators Training

After completing this one-day instructor-led course, professionals will be equipped with the skills needed to manage SharePoint servers using PowerShell.

55069: PowerShell for SQL Server Administrators Training

This course guides learners on how to use PowerShell and SMO features to administer SQL Server. Students learn to maintain daily and scheduled maintenance works.

55095: SharePoint 2010 and 2013 Auditing and Site Content Administration using PowerShell Training

This one-day training is designed for auditors and server administrators of SharePoint 2010 and 2013 who must query virtually every aspect of SharePoint.

55202: PowerShell 5.0 and Desired State Configuration Training

The course is created to have you ready to use DSC (Desired State Configuration). DSC goes hand in hand with DevOps implementation and allows you to join development and operations.

55207: PowerShell for SQL Administration Training

The course focuses on commonly used SQL administrative tasks and provides core understanding required for admins to utilize the ever-growing PowerShell SQL interoperations.

AZ-040T00: Automating Administration with PowerShell Training

This Automating Administration with PowerShell training course will help you with the fundamental skills and knowledge to utilize PowerShell for administering and automating the administration of Windows Servers.

Office 365

55154: Office 365 for the End-User Training

The one-day course offers students the skills to efficiently use Office 365 daily. We use real-world experience through our lab to prepare students to take the responsibilities head-on.

55261: SharePoint for Office 365 Site Owner Training

The two-day course covers SharePoint site owner-related topics and gives both fundamental and advanced walkthroughs to make students familiar with Office 365 in a SharePoint environment.

55262: Introduction to SharePoint for Office 365 Training

The one-day class introduces students to Office 365 in a SharePoint environment. This course is the shortened version of our full-fledged Office 365 in a SharePoint environment.

55283: Microsoft Office 365 Power User Training

We teach you collaboration throughout the business process and make you understand what functions to use to maximize the adoption of Office 365 in a business organization.

55281: SharePoint Online Branding Training

This branding course will guide you on using the non-code options and advice on where to look for the resources. This course will not cover writing the code for non-standard customizations.

55302: Microsoft Lists for End Users Training

This End Users training delivers a breakdown of Microsoft Lists. It is a one-day instructor-led training, and professionals will understand how to empower their data and become organized with a rich range of customizable table types.

55354: Administering Office 365 Training

In this course, you will learn how to plan the configuration of an Office 365 tenant including integration with existing user identities; plan, configure and manage core services; and report on key metrics.

Dynamics 365

PL-600T00: Power Platform Solution Architect Training

The Microsoft powerful platform solution architect training course helps professionals in the successful implementation of platforms. It also makes them skillful at recognizing how the solutions address the firms' broader business and technical needs.

MB-210T01: Microsoft Dynamics 365 Sales Training

MB-210T01: Microsoft Dynamics 365 for Customer Engagement for Sales Training provides professionals with the knowledge and skills to manage current and potential clients more effectively.

MB-230T01: Microsoft Dynamics 365 Customer Service Training

MB-230T01: Dynamics 365 for Customer Engagement for Customer Service Training is developed to help companies and organizations achieve customer success.

MB-220T00: Microsoft Dynamics 365 Marketing Training

In this course, professionals will learn about managing the marketing application to drive its growth. It also includes lead management, page segmentation, marketing forms, and email marketing messages.

MB-240T00: Microsoft Dynamics 365 Field Service Training

This is a course that helps professionals deliver a better position to an organization. That implies; professionals will better position a business using Dynamics 365 field services.

MB-910T00: Microsoft Certified: Dynamics 365 Fundamentals (CRM) Training

Professionals who are previously intimate with business administration and customer relationship management will need this course. Microsoft Dynamics 365 Fundamentals (CRM) course intends for all tech-savvy professionals.

MB-920T00: Microsoft Dynamics 365 Fundamentals (ERP) Training

If a professional has broad exposure to enterprise and resource planning, this is the most suitable course for them. The professionals who are common to the business environment and have basic knowledge about financial principles or are tech-savvy can participate in the course.

MB-335T00: Microsoft Dynamics 365 Supply Chain Management Expert Training

In this course, you'll learn how to create, configure, and manage your product and inventory, as well as the most important features and functions required by a functional consultant for Dynamics 365 Supply Chain Management.

MB-500T00: Microsoft Dynamics 365: Finance and Operations Apps Developer Training

MB-500T00: Microsoft Dynamics 365: Finance and Operations Apps Developer Training is aimed at professionals to teach them the leading methodologies to implement and expand apps to satisfy the needs of the organization.

MB-300T00: Microsoft Dynamics 365: Core Finance and Operations Training

This course offers Professional basic skills in which professionals will automate and modernize the business's global financial operations. Professionals will also learn skills to monitor a business's performance in real-time.

MB-310T00: Microsoft Dynamics 365 Finance Training

In this program, professionals will discover the financial aspects of Dynamics 365. Using this essential financial component, professionals will find accounts payable, accounts receivable, collections, budgeting, fixed assets, additional functionality, and many more.

MB-320T00: Microsoft Dynamics 365 Supply Chain Management, Manufacturing Training

This course has six modules. In the first module, professionals will study configuring the need for Dynamics 365 Supply Chain Management.

MB-330T00: Microsoft Dynamics 365 Supply Chain Management Training

In this course, professionals will learn about building a foundation in Dynamics 365 Supply Chain Management. The course will further cover the most vital features and functionalities needed by Dynamics 365 Supply Chain Management.

MB-340T00: Microsoft Dynamics 365 Commerce Functional Consultant Training

Dynamics 365 Commerce Functional Consultant training is a 4-day training course. This training set up and used the application functionality in Microsoft Dynamics 365 Commerce and supported the application.

PL-200T00: Microsoft Power Platform Functional Consultant Training

The Power Platform allows enterprises for automating business procedures, developing their own perfect app experience, and connects with users faster and better.

PL-400T00: Microsoft Power Platform Developer Training

The Microsoft Power Platform empowers companies in optimizing their operations by easing, automating, and modifying business procedures and tasks. If you seriously have a zeal to design, develop, secure, and extend MS Power Platform solutions, this particular certification could be right for you.

55250: Introduction to Microsoft Dynamics 365 Training

This training is offered by Microtek Learning to help students understand the fundamentals of Microsoft Dynamics 365 Customer Engagement by creating a foundation for all subsequent learning and courses.

55242: Microsoft Dynamics 365 Customization and Configuration Training

This training offered by Microtek Learning helps students gain an in-depth understanding of setting up, customizing, configuring, and managing Microsoft Dynamics 365 Customer Engagement along with detailed hands-on experience.

55259: Microsoft Dynamics 365 Customer Engagement for Developers Training

Microtek Learning provides this training for experienced developers and IT professionals, offering a fast track approach to understand and learn about various skills required to develop code in Microsoft Dynamics 365.

MB-700T00: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Training

MB-700T00: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Training is designed to help professionals develop a better understanding of the important resources and tools to evaluate Dynamics 365 for Operations, apply it and maintain it proactively.

MB-800T00: Microsoft Dynamics 365 Business Central Functional Consultant Training

Growing businesses often leave behind their legacy enterprise resource planning (ERP) systems or basic accounting software that are not capable to manage increased transactions and inventory, integration with different line-of-business systems, and reporting restrictions.

55258: Microsoft Dynamics 365 for Sales Training

This Dynamic 365 training course provides you with a complete hands-on experience of the sales features of Microsoft Dynamic 365.

55260: Microsoft Dynamic 365 for Customer Service Training

With this Customer Service training, you will experience detailed Customer Service features of Microsoft Dynamic 365.

Microsoft 365

MS-102T00: Microsoft 365 Administrator Essentials Training

Three crucial aspects of Microsoft 365 administration are covered in the MS-102T00: Microsoft 365 Administrator Essentials course: Microsoft 365 tenancy management, Microsoft 365 security and compliance, and Microsoft 365 identity synchronization.

MS-900T01: Microsoft 365 (M365) Fundamentals Training

MS-900T01: Microsoft 365 (M365) Fundamentals Training is designed to help professionals develop a foundational understanding of the consideration and advantages of adopting cloud services.

MS-700T00: Managing Microsoft Teams (Teams Administrator) Training

MS-700T00: Managing Microsoft Teams Training is aimed at professionals to teach them various techniques to manage MS teams in their companies. This technical course provides MS Teams overview, deploying teams, implementing security, governance, and compliance for MS Teams.

MS-721T00: Collaboration Communications Systems Engineer Training

The goal of this training is to equip students with the expertise necessary to perform the duties of a Collaboration Communications Systems Engineer.

MS-300: Deploying Microsoft 365 Teamwork Training

MS-300: Deploying Microsoft 365 Teamwork Training is aimed at professionals to teach them the techniques to handle user-profiles and applications with proper permission settings.

MS-301: Deploying SharePoint Server Hybrid Training

MS-301: Deploying SharePoint Server Hybrid Training provides professionals with the skills and knowledge required to plan the content migration process.

MD-102T00: Microsoft 365 Endpoint Administrator Training

The course covers co-management strategies, fundamentals of contemporary management, and Microsoft Intune integration. Key security topics including identities, access, authentication, and compliance policies are covered, along with the deployment of applications and management of browser-based apps.

MS-080T00: Employee Experience Platform Specialist Training

This course will teach you how to organize people to create a positive employee experience that will boost productivity, foster empathic leadership, and change how people feel about their jobs.

MS Office

Microsoft Excel - Basics To Advanced Training

Learn how you can effectively use Microsoft Excel in real-world scenarios to automate tasks, analyze data, and generate concise one-page reports.

Microsoft Word - Basics To Advanced Training

This Combo pack includes the entire Microsoft Word suite.

Microsoft Power Apps

PL-900T00: Microsoft Power Platform Fundamentals Training

PL-900T00: Microsoft Power Platform Fundamentals Training provides comprehensive knowledge and an in-depth explanation of the product capabilities and business value of Power Platform.

55268: Microsoft Power Automate for End Users Training

The Mastering 55268: Microsoft Flow Training will provide you with practical and engaged methods. Microsoft Flow is the diversified product, Turning processing of business into consistent, automated, and visualized workflows.

55265: Microsoft PowerApps For End Users Training

This instructor-led training is intended to deliver a breakdown of Microsoft PowerApps where students can learn how to publish, test and design new applications that work with a variety of data sources.

PL-200T00: Microsoft Power Platform Functional Consultant Training

The Power Platform allows enterprises for automating business procedures, developing their own perfect app experience, and connects with users faster and better.

PL-400T00: Microsoft Power Platform Developer Training

The Microsoft Power Platform empowers companies in optimizing their operations by easing, automating, and modifying business procedures and tasks. If you seriously have a zeal to design, develop, secure, and extend MS Power Platform solutions, this particular certification could be right for you.

PL-100: Microsoft Power Platform App Maker Training

This course is designed exclusively for IT professionals. It will help professionals learn how to build an app with low-code techniques. By obtaining this course, professionals will make apps to automate and transform the business.

PL-600T00: Power Platform Solution Architect Training

The Microsoft powerful platform solution architect training course helps professionals in the successful implementation of platforms. It also makes them skillful at recognizing how the solutions address the firms' broader business and technical needs.

PL-500T00: Microsoft Power Automate RPA Developer Training

For this Microsoft Power Automate RPA Developer training course, students will learn to automate time-consuming and repetitive tasks using Microsoft Power Automate.

PL-300T00: Power BI Data Analyst Training

This PL-300 Microsoft Power BI Data Analyst training course will help you learn the diverse methods and most promising practices in line with technical and business requirements for analyzing, modeling, and visualizing data with Microsoft Power BI.

Microsoft Security

SC-900: Microsoft Security, Compliance, & Identity Fundamentals Training

Microsoft Security, Compliance, & Identity Fundamentals training course intends for all those professionals looking to learn about the basics of security compliance and identity concepts.

AZ-500T00: Microsoft Azure Security Technologies Associate (Security Engineer) Training

AZ-500T00: Microsoft Azure Security Technologies Associate (Security Engineer) Training is aimed at professionals to help them gain the skills and knowledge required to maintain the security posture, implement security control and recognize and remediate vulnerabilities with the help of various security tools.

SC-200: Microsoft Security Operations Analyst Training

Microsoft Security Operations Analyst training is a great course that is intended for all security engineers. In the course, the Microsoft security operations analysts amalgamate with the original stakeholder to develop secure IT systems for any firm.

SC-300: Microsoft Identity & Access Administrator Training

SC-300: Microsoft Identity & Access Administrator training course is for all the identity and access administrators willing to take the associated certification exam. The professionals who are already performing the identity and access administration task need this course.

MS-500: Microsoft 365 Security Administration Training

In this course, professionals will study how to get secure user access to an organizational resource. The course indulges user password protection, multi-factor authentication, and enables Azure identity protection.

SC-400: Microsoft Information Protection Administrator Training

Microsoft Information Protection Administrator training is a career-defining course intended for all IT personnel. The professional will plan and implement measures to meet a firm's compliance needs on learning this course.

SC-100T00: Microsoft Cybersecurity Architect Training

This Microsoft Cybersecurity Architect training course help candidates with the background to evaluate and design cybersecurity strategies in the areas.

ISO/IEC 27001 Information Security Management Systems

ISO/IEC 27001 Foundation Training

ISO/IEC 27001 Foundation training course enables you to understand the fundamental elements to execute and manage an ISMS (Information Security Management System) as specified in ISO/IEC 27001.

ISO/IEC 27001 : 2022 Lead Implementer Training

This five-day ISO IEC 27001 Lead Implementer training allows individuals to gain knowledge essential to assist an organization in effectively planning, implementing, managing, monitoring, and maintaining an Information Security Management System (ISMS).

ISO/IEC 27001 : 2022 Lead Auditor Training

This five-day ISO 27001 Lead Auditor training and certification allows individuals to improve their expertise to perform an ISMS (Information Security Management System) audit by implementing widely recognized audit principles, procedures, and techniques.

ISO/IEC 27001 Transition Training

The ISO/IEC 27001 Transition training course enables participants to thoroughly understand the differences between ISO/IEC 27001:2013 and ISO/IEC 27001:2022. In addition, participants will acquire knowledge on the new concepts presented by ISO/IEC 27001:2022.

ISO/IEC 27002 Information Security Controls

ISO/IEC 27002 Foundation Training

Participants in the ISO/IEC 27002 Foundation training course can study the fundamentals of implementing and managing information security measures in accordance with ISO/IEC 27002.

ISO/IEC 27002 Manager Training

Participants in the ISO/IEC 27002 Manager program can learn the knowledge and abilities required to assist an organization in choosing, putting into practice, and administering information security measures based on ISO/IEC 27002.

ISO/IEC 27002 Lead Manager Training

The ISO/IEC 27002 Lead Manager training course is designed to provide participants with an in-depth understanding of the implementation and management of information security measures in accordance with ISO/IEC 27002.

ISO/IEC 27005 Information Security Risk Management

ISO/IEC 27005 Foundation Training

The two-day training course for ISO/IEC 27005 Foundation focuses on the structure of the standard and the information security risk management approach that ISO/IEC 27005 uses.

ISO/IEC 27005 Risk Manager Training

Participants in the ISO/IEC 27005 Risk Manager training course acquire the skills necessary to understand the steps involved in creating, implementing, maintaining, and bettering an information security risk management framework in accordance with the principles of ISO/IEC 27005.

ISO/IEC 27032 Cyber Security

ISO/IEC 27032 Cyber Security Foundation Training

The ISO/IEC 27032 Foundation training teaches you the foundation cybersecurity concepts and principles based on ISO/IEC 27032 and NIST cybersecurity framework.

ISO/IEC 27032 Lead Cybersecurity Manager Training

This five-day ISO/IEC 27032 Lead Cybersecurity Manager training course helps you understand the expertise and competence needed to support a business in implementing and managing a Cybersecurity program based on ISO/IEC 27032 and NIST Cybersecurity framework.

ISO/IEC 27035 Information Security Incident Management

ISO/IEC 27035 Foundation Training

ISO/IEC 27035 Foundation training helps professionals understand the essential factors to implement an Incident Management Plan and maintain Information Security Incidents.

ISO/IEC 27035 Lead Incident Manager Training

In this five-day ISO/IEC 27035 Lead Incident Manager training course, professionals will understand the required expertise to establish a corporation performing an Information Security Incident Management plan based on ISO/IEC 27035.

ISO/IEC 27701 Privacy Information Management System

ISO/IEC 27701 Foundation Training

This ISO/IEC 27701 Foundation training is a 2-days training, and it helps you learn the fundamental concepts and principles of a Privacy Information Management System (PIMS).

ISO/IEC 27701 Lead Implementer Training

This course helps you understand the necessary skills to assist an organization in establishing, implementing, maintaining, and continually develop a Privacy Information Management System (PIMS) based on ISO/IEC 27701 by improving an existing ISMS based on ISO/IEC 27001 and ISO/IEC 27002.

ISO/IEC 27701 Lead Auditor Training

This course helps you understand the necessary expertise to perform a Privacy Information Management System (PIMS) audit by implementing audit principles, procedures, and techniques.

ISO 31000 Risk Management

ISO 31000 Foundation Training

This ISO 31000 Foundation Training is a two-day training in which you will learn basic principles and approaches of managing risks and opportunities based on the guidelines of ISO 31000.

ISO 31000 Risk Manager Training

This ISO 31000 Risk Manager training is a three-day training in which you will learn all the necessary basic knowledge and ability to integrate the risk management guidelines of ISO 31000 in an organization.

ISO 22301 Business Continuity Management System

ISO 22301 Foundation Training

With 22301 training, participants can understand the basic concepts and principles of a BCMS (Business Continuity Management Systems) based on ISO 22301.

ISO 22301 Lead Implementer Training

In this five-day training course, students will understand the fundamental expertise needed to maintain an organization in managing and implementing a BCMS (Business Continuity Management System) based on ISO 22301.

ISO 22301 Lead Auditor Training

In this five-day training course, students will understand the required expertise to audit a BCMS (Business Continuity Management System) and maintain a team of advisers by applying widely acknowledged audit principles, procedures and techniques.

ISO 22301:2019 Transition Training

This ISO 22301:2019 training course is a two-day training that gives you complete information about the revised clauses, reduces the prescriptiveness of the standard, removes terminology, etc.

ISO 22301 Business Continuity Management System

ISO 22301 Foundation Training

With 22301 training, participants can understand the basic concepts and principles of a BCMS (Business Continuity Management Systems) based on ISO 22301.

ISO 22301 Lead Implementer Training

In this five-day training course, students will understand the fundamental expertise needed to maintain an organization in managing and implementing a BCMS (Business Continuity Management System) based on ISO 22301.

ISO 22301 Lead Auditor Training

In this five-day training course, students will understand the required expertise to audit a BCMS (Business Continuity Management System) and maintain a team of advisers by applying widely acknowledged audit principles, procedures and techniques.

ISO 22301:2019 Transition Training

This ISO 22301:2019 training course is a two-day training that gives you complete information about the revised clauses, reduces the prescriptiveness of the standard, removes terminology, etc.

ISO/IEC 20000 IT Service Management System

ISO/IEC 20000 Foundation Training

Learn about the IT Service Management Systems (ITSMS) best practices that are based on ISO/IEC 20000.

ISO/IEC 20000 Lead Implementer Training

Gain the skills required to create, implement, run, maintain, and enhance a service management system based on ISO/IEC 20000-1.

ISO/IEC 20000 Lead Auditor Training

Learn how to conduct an IT Service Management System (ITSMS) audit using ISO/IEC 20000.

EC-Council

CEH - Certified Ethical Hacker v12 Training

In this online course for ethical hacking certification, you will learn advanced methods for network packet analysis and system penetration testing that will help you strengthen your network security knowledge and resist hackers. You will get access to certified experts who can help you at every step of the learning process.

CND - Certified Network Defender Training

Our EC-Council-certified instructors give students a more profound understanding of network protocol, security protocol, VPN and firewall configuration, network analysis, and scanning for possible vulnerabilities.

CHFI - Computer Hacking Forensic Investigator v10 Training

The CHFI: Certified Hacking Forensic Investigator training course is a completely ANSI-accredited and lab-focused program. This CHFI training is vendor-neutral training in digital forensics.

CTIA: Certified Threat Intelligence Analyst Training

CTIA- Certified Threat Intelligence Analyst Training is a well-designed, comprehensive technical course. It is coherently organized, making it easier for the trainees to carry out activities such as developing a systematic, professional, and long-term effective threat intelligence program.

ECIH: Certified Incident Handler Training

The Certified Incident Handler E|CIH program is method-driven and takes a holistic approach to covering a wide range of topics related to incident handling and response in organizations, from pre-incident planning to asset recovery following a security breach.

CSA: Certified SOC Analyst Training

Candidates for CSA certification get access to some of the most qualified instructors in the business, who teach them cutting-edge techniques that are in high demand.

EC-Council Certified Security Analyst (ECSA) V10 Training

EC Council Certified Security Analyst (ECSA) V10 Training program equips the IT professionals with adequate knowledge ranging from Social Engineering Pen-Testing to Penetration reporting and Pen testing methodologies.

Blockchain Developer Training

The course aims to provide developers with a comprehensive understanding of blockchain technology, including its impact and applications in business and finance.

CPENT: Certified Penetration Testing Professional Training

You can learn everything you need to know about attacking, exploiting, dodging, and defending enterprise networks in the Certified Penetration Testing Professional (C|PENT) course.

CCISO: Certified Chief Information Security Officer Training

The chief information security officer (C|CISO) training and certification program is the first of its kind and has trained top-tier information security professionals all around the world.

ISACA

CobIT 5 Foundation Training

This technical course provides a perfect blend of practices, principles, analytical tools, and models, and is suitable for enterprises that require the implementation of IT for its daily functioning.

CSX Practitioner I: Identification and Protection Training

CSX Practitioner I: Identification and Protection Training, teaches you to identify and protect network hazards. Individuals who apply for this technical course learn how to use and apply industry-developed methods, to identify specific internal and external network threats.

CSX Practitioner II: Detection Training

CSX Practitioner II: Detection Training educates individuals about the basic methods, concepts, and tools used to leverage cybersecurity controls and enhance their ability to detect system events and non-events incidents.

CSX Practitioner III: Respond and Recover Training

CSX Practitioner III: Respond and Recover Training is the final course in the CSX practitioner series, and it inspects both the Respond and Recover domains.

CSX Practitioner Exam Prep Course Training

CSX Practitioner Exam Prep Course Training prepares you for the examination and helps you revise everything quickly. It covers all the five areas (Identify, Protect, Detect, Respond, Recover) and provides you with comprehensive coverage of the concepts and skills.

CSX Cybersecurity : Cybersecurity Fundamentals Training

Cybersecurity Fundamentals Training is developed for professionals with an extensive understanding of the principles that define and frame cybersecurity.

CISA - Certified Information Systems Auditor Prep Course Training

CISA - Certified Information Systems Auditor Prep Course Training provides you with comprehensive coverage on all the CISA exam domains offered by the ISACA (Information Systems Audit and Control Association).

CISM - Certified Information Security Manager Prep Course Training

CISM - Certified Information Security Manager Prep Course Training is designed to help people develop a good understanding of the relationship between information security programs and broader organizational objectives.

CRISC Prep Course Training

In this course, you'll cover all four domains of the ISACA Certified in Risk and Information Systems Control (CRISC) exam and gain the knowledge and concepts required to obtain CRISC certification.

CompTIA

CompTIA Security+ Training

CompTIA Security+ Training allows aspirants to gain valuable information for the implementation and maintenance of information security via a vendor-neutral format.

CompTIA Network+ Training

CompTIA Network+ Training technical course is valid globally to impart fundamentals to foundation-level IT network practitioners. This course efficiently develops user-level knowledge and expertise to work on personal computer operating systems and networks.

CompTIA A+ Training

This training helps in getting the DoD Directive 8570 requirements for appearing for the CompTIA A+ Exam. It helps in giving students knowledge of the underlying operating system and computer hardware.

CompTIA IT Fundamentals (ITF+) Training

CompTIA IT Fundamentals (ITF+) Training allows aspirants to develop a broader IT foundation and get certifications in specific fields. You can achieve a stepping stone to success for specialized training in CompTIA Network+ and CompTIA Security A+.

CompTIA Cloud+ Training

The intention of this course is the development of cloud computing skills for professionals to manage IT workloads and ensure complete integration of products and services from different sectors.

CompTIA Server+ Training

CompTIA Server+ Certification Prep (Exam SK0-005) Training course helps get information on computer and hardware support and handling administration for any network server.

CompTIA Linux+ Training

CompTIA Linux+ Certification Prep (Exam XK0-005) Training course defines a proper framework to work with Linux for junior administrators and software developers.

CompTIA Advanced Security Practitioner (CASP+) Training

CompTIA Advanced Security Practitioner (CASP+) Certification Prep (Exam CAS-004) Training helps you gain details on information security to take your career to the next level.

CompTIA Cybersecurity Analyst (CySA+) Training

Microtek Learning's proactive course model helps professionals gain knowledge of cybersecurity analysts' duties who can efficiently monitor and detect security incidents through information systems to respond with immediate effect.

CompTIA PenTest+ Training

CompTIA PenTest+ Certification Prep (Exam PT0-002) Training course is an excellent option for the cybersecurity professionals who need to perform tasks of identifying, exploiting, reporting, and managing the vulnerabilities for any network.

CompTIA Project+ Training

CompTIA Project+ Certification Prep Training module explores in-depth project management life cycle that includes planning, control, execution, initiation, and closure of any project.

CompTIA Cloud Essentials+ Training

CompTIA Cloud Essentials+ Certification Prep Training course offers an instructor-led training experience to the aspirants who wish to procure certification for the relevant course.

ITIL 4

ITIL4 Foundation Training

ITIL (Information Technology Infrastructure Library) Foundation training focuses on how professionals can enhance their ability to plan, select, and maintain IT services in a business setup.

ITIL 4 Practitioner Training

With clearly outlined objectives, proper assistance on how to adapt and adopt the ITIL framework, ITIL Practitioner Training guarantees an individual a wide range of benefits after completing the training.

ITIL 4 Foundation and Practitioner Training

This ITIL Foundation and Practitioner technical training program equips professionals with knowledge that gives a competitive advantage.

ITIL 4 Specialist: Create, Deliver and Support Training

Our IT solutions integrate various value streams and activities to create, deliver, and support IT-enabled products and services of the highest quality. To ensure that our clients receive the best possible results, we employ advanced techniques, methods, and technology.

ITIL 4 Specialist: Drive Stakeholder Value Training

This course covers important subjects including SLA design, managing multiple suppliers, communicating with others, managing relationships, CX and UX design, customer journey mapping, and more.

ITIL 4 Strategist: Direct, Plan and Improve Training

Learn the skills you need to build a "learning and improving" IT organization with a strong strategic direction!

ITIL 4 Leader: Digital & IT Strategy Training

Digital and IT strategy focuses on how technological disruption is affecting enterprises across all industries and how business executives are reacting.

ITIL 4 Specialist: Sustainability In Digital & IT Training

The ITIL 4 Specialist: Sustainability in Digital & IT covers how service organizations may deal with sustainability issues in regard to their digital and IT tactics, strategies, and operations, with a focus on the ITIL Service Value Chain and ITIL practices.

ITIL 4 Specialist: Acquiring & Managing Cloud Services Training

This program offers vendor-neutral, user-centric assistance in gaining a practical grasp of how cloud technology and procurement can fit into and support more comprehensive company strategy and functions using the ITIL framework.

ITIL 4 Specialist: High Velocity IT Training

ITIL 4 offers enterprises useful and adaptable guidelines to help them on their path toward digital transformation.

PRINCE 2

PRINCE2 Foundation Training

PRINCE2 Foundation Training is a comprehensive technical course to help professionals understand the PRINCE2 method.

PRINCE2 Practitioner Training

PRINCE2 Practitioner Training is a globally acclaimed training program that trains professionals who manage any projects.

PRINCE2 Foundation & Practitioner Training

PRINCE2 Foundation & Practitioner Training accommodates all the necessary information required to gain both the Foundation and Practitioner knowledge in PRINCE2.

PRINCE2 Agile Foundation Training

The PRINCE2 Agile Foundation Training combines the framework of PRINCE2 with the responsiveness and flexibility of Agile.

PRINCE2 Agile Practitioner Training

PRINCE2 Agile Practitioner Training flawlessly puts together the Agile methodologies with the world's most preferred approach to project management, making it a complete project management solution.

PRINCE2 Agile Foundation & Practitioner Training

PRINCE2 Agile Foundation & Practitioner Training is developed to broaden and enhance your project management horizons.

Checkpoint

CCSA Check Point Certified Security Administrator Training

CCSA R80.20 Check Point Cyber Security Administrator Training aims at developing the fundamental skills to understand and analyze the essential concepts for the configuration of Check Point Security Gateway and Management Software Blades. Students from various technical fields can opt to learn through this blended-live training course.

CCSA+CCSE Check Point Certified Security Administrator and Expert Boot Camp Training

This special CCSA and CCSE bundle covering Check Point Certified Security Administrator and Security Expert content (R80.40) validate and enhances your skills to manage Check Point advanced security management systems and to administer IT security fundamental tasks.

CCSE Check Point Certified Security Expert Training

CCSE R80.20 Check Point Cyber Security Engineering Training focuses on preparing the aspirants for CCSA and CCSE exams and certifications. Professionals with fundamental know-how on Check Point products can opt for an Instructor-led training course.

CCAS Check Point Certified Automation Specialist Training

CCAS Check Point Certified Automation Specialist Training course provides you with extensive learning of automation and Checkpoints Management API architecture.

CCES Check Point Certified Endpoint Specialist Training

CCES Check Point Certified Endpoint Specialist Training aims at offering a proficient live online training program for tech-based professionals. They want to deploy and manage Endpoint Security with a dedicated security environment.

CCTA Check Point Troubleshooting Administration Training

CCTA Check Point Troubleshooting Administration Training course helps analyze the concepts and skills essential for troubleshooting technical issues. It involves the management of Check Point Security Management architecture and the Security Gateways.

CCVS Check Point Certified VSX Specialist Training

This is a 2-day Specialist course which provides a comprehensive understanding of the Check Point Virtual Security Extension (VSX) solution and describes how to deploy it within the corporate network environment.

CCCS Check Point Certified Cloud Specialist - Administrator Training

This 2-day Specialist course which provides an understanding of the basic concepts and skills necessary to configure and deploy Check Point CloudGuard IaaS products in public cloud platforms such as Microsoft Azure, Amazon Web Services (AWS), and Google Cloud Platform.

Citrix

CWS-215 Citrix Virtual Apps and Desktops 7 Deployment and Administration Training

CWS-215 Citrix Virtual Apps and Desktops 7 Administration On-Premises and Citrix Cloud Training provide professionals with the foundational understanding of Citrix Virtual Applications and Desktop 7.

CWS-415 Citrix Virtual Apps and Desktops 7 Architect Design Solutions Training

CWS-415 Citrix Virtual Apps and Desktops 7 Assessment, Design, and Advanced Configuration Training is aimed to educate professionals about the design principles required for building Citrix Virtual Apps and Desktop virtualization solutions.

CWS-250 Citrix DaaS Deployment and Administration Training

In this course, you will learn how to create a new Citrix DaaS deployment and how to migrate to Citrix DaaS from an on-premises Citrix Virtual Apps and Desktops Site.

CWS-251 Implement Citrix DaaS on Microsoft Azure Training

Gain the knowledge necessary to organize your virtual machine design and machine catalog based on Microsoft's public cloud, and practice actually deploying those machines using Machine Creation Services.

CWS-252 Citrix DaaS Deployment and Administration on Microsoft Azure Training

In this course, you will learn how to create a brand new Citrix DaaS deployment on Citrix Cloud by utilizing Microsoft Azure as your resource host.

CNS-221 Citrix (NetScaler) Gateway 12.x Training

This course enables the professionals to learn and arrange NetScaler Gateway with Unified Gateway highlights. It extends an integrated knowledge of the execution of Gateway parts with Netscaler Gateway.

CNS-220 Citrix (NetScaler) ADC 12.x Essentials and Traffic Management Training

CNS-220 Citrix (NetScaler) ADC 12.X Essentials and Traffic Management course is a blended-live five-day interactive class that imparts knowledge on cutting edge system administration and NetScaler ideas for setups.

CNS-219 Citrix (NetScaler) ADC 12.x Traffic Management Training

CNS-219 Citrix (NetScaler) ADC 12.X Traffic Management technical training intends to focus at details on past Netscaler encounters and conveying NetScaler situations.

CNS-318 Citrix (NetScaler) ADC 12.x Advanced Concepts - Secure Web Applications Training

CNS-318 Citrix (NetScaler) ADC 12.X Advanced Concepts - Secure Web Applications technical training is apt for the aspirants working with NetScaler application and Firewall in Citrix Netscaler conditions.

CNS-319 Citrix (NetScaler) ADC 12.x Advanced Concepts - Management and Optimization Training

This training deals with the NetScaler Management and Analytics System (MAS) to gain control over the Citrix Netscaler condition or advanced Netscaler application and conveyance activity.

CNS-320 Citrix (NetScaler) ADC 12.x Advanced Concepts - Security, Management, and Optimization Training

CNS-320 Citrix (NetScaler) ADC 12.X Advanced Concepts - Security, Management, And Optimization Training program is appropriate for the students who wish to send and oversee Citrix NetScaler Application Management for securing the application access in any Citrix Netscaler conditions.

CNS-420 Citrix (NetScaler) Networking Assessment, Design, and Advanced Configuration Training

CNS-420 Citrix (NetScaler) Networking Assessment, Design, and Advanced Configuration Training exposes professionals to networking and NetScaler configurations and concepts.

CNS-222 Citrix (NetScaler) ADC 12.x Essentials and Citrix Gateway Training

CNS-222 Citrix (NetScaler) ADC 12.x Essentials and Citrix Gateway Training is a complete solution for expanding Citrix networking skills and knowledge.

CNS-231 Deploy and Manage Citrix SD-WAN 11.x Training

CNS-231 Deploy and Manage Citrix SD-WAN 11.x Training teaches professionals how to configure and manage SD-WAN, including deployment options, SD-WAN overall structure, provisioning, and the appropriate ways to utilize Citrix SD-WAN Orchestrator in your environment.

CNS-224: Implement Citrix ADC 13.x with Traffic Management Training

CNS-224: Implement Citrix ADC 13.x with Traffic Management training is developed to help professionals gain the skills and knowledge required to manage and configure Citrix ADC Traffic Management features, which includes Traffic Optimization, Content Switching, and Global Server Load Balancing.

CNS-225: Deploy and Manage Citrix ADC 13.x with Traffic Management Training

CNS-225: Deploy and Manage Citrix ADC 13.x with Traffic Management training provides comprehensive knowledge and an in-depth explanation of Citrix ADC.

CNS-226 Implement Citrix ADC 13.x with Citrix Gateway Training

Learn the skills required to configure and manage Citrix Gateway features. At the end of the course, students will be able to configure their Citrix Gateway environments to address remote access requirements for Apps and Desktops.

CNS-227 Deploy and Manage Citrix ADC 13.x with Citrix Gateway Training

Expand your Citrix networking knowledge and skills by enrolling in this five-day course. It covers Citrix ADC essentials, including secure load balancing, high availability and operations management, and also focuses on Citrix Gateway.

CWS-316 Citrix Provisioning 7 Administration Training

CWS-316 Citrix Provisioning 7 Administration Training is aimed at professionals to develop a better understanding of Provisioning Services architecture and communication.

CSF-201 Citrix (ShareFile) Content Collaboration Enterprise Essentials Training

CSF-201 Citrix (ShareFile) Content Collaboration Enterprise Essentials Training provides comprehensive knowledge regarding enterprise file sharing and synchronization with Citrix Content Collaboration.

CSF-202 Deploy and Manage Citrix Content Collaboration Training

In this course, you'll learn about how to use Citrix Content Collaboration to share, sync, and secure content for your organization.

CWS-215 Citrix Virtual Apps and Desktops 7 Deployment and Administration Training

CWS-215 Citrix Virtual Apps and Desktops 7 Administration On-Premises and Citrix Cloud Training provide professionals with the foundational understanding of Citrix Virtual Applications and Desktop 7.

CWS-415 Citrix Virtual Apps and Desktops 7 Architect Design Solutions Training

CWS-415 Citrix Virtual Apps and Desktops 7 Assessment, Design, and Advanced Configuration Training is aimed to educate professionals about the design principles required for building Citrix Virtual Apps and Desktop virtualization solutions.

CXD-105 Citrix Virtual Apps and Desktops 7.x Help Desk Support Training

CXD-105 Citrix Virtual Apps and Desktops 7.X Help Desk Support training course helps the students to use Citrix Director to develop an interface with user sessions to solve issues or escalate the same to the administration team.

CXD-250 Moving to the Citrix Virtual Apps and Desktops Service on Citrix Cloud Training

With this technical training, students can get a better understanding of the navigation of Citrix Virtual Apps and Desktop service to the Citrix cloud. This guide takes you through the architecture, management, communication, configuration, and installation of Citrix Cloud and the cloud connector.

CXD-251 Citrix Virtual Apps and Desktops Service on Microsoft Azure Training

This technical training program provides learning on the deployment and management of Citrix Virtual Apps and desktops within Microsoft Azure. Students could derive the machine catalog based on Microsoft's public cloud and deploy them with relevant creation services.

CXD-252 Moving to the Citrix Virtual Apps and Desktops Service on Citrix Cloud with Microsoft Azure Training

CXD-252 Moving to the Citrix Virtual Apps and Desktops Service on Citrix Cloud with Microsoft Azure technical training helps impart relevant skill sets to the IT professionals handling Citrix Cloud and Microsoft Azure.

CMB-318 Citrix Virtual Apps and Desktops 7, App Layering and WEM Administration (Fast Track) Training

CMB-318 Citrix Virtual Apps and Desktops 7, App Layering and WEM Administration (Fast Track) Training helps IT professionals learn more about configuring policies, basic security features, printing along with other advanced topics, which includes App layering, and Windows Environment Management.

CWS-206 Citrix Workspace Microapps Essentials Training

CWS-206 Citrix Workspace Microapps Essentials Training introduces professionals to Citrix Workspace with Microapps. It is packed with in-depth information on Citrix Microapps, security considerations, web services, and API troubleshooting to guide you through launching microapps in your environment without any complications.

CWS-313 Citrix Virtual Apps and Desktops 7 Advanced Deployment, Troubleshooting, Security and Administration Training

CWS-313 Citrix Virtual Apps and Desktops 7 Advanced Deployment, Troubleshooting, Security, and Administration Training is specially developed to help professionals implement the latest administration concepts such as disaster recovery, scalability, backups, and redundancy for a Citrix Virtual Application and Desktop 7 site.

CWS-314 Citrix App Layering and WEM Administration Training

CWS-314 Citrix App Layering and WEM Administration Training is a perfect course for people who want to learn the right way to implement app layering skills.

CWS-315 Citrix Virtual Apps and Desktops 7 Advanced Administration Training

CWS-315 Citrix Virtual Apps and Desktops 7 Advanced Administration Training teaches you to improve virtual resource consumption and the end-user environment by efficiently configuring workspace environment management.

CWS-115 Citrix Virtual Apps and Desktops 7 Help Desk Support Training

CWS-115 Citrix Virtual Apps and Desktops 7 Help Desk Support Training is designed to educate professionals about the procedures to support end-users linking to Citrix Virtual Apps and Desktops through Citrix Workspace App.

CWS-220 Citrix Workspace Environment Management Deployment and Administration Training

This course builds on the fundamental implementation and administration abilities by introducing scalability, redundancy, and security setups. It is intended for seasoned IT workers.

CWS-322 Citrix Virtual Apps and Desktops 7 Advanced Configuration and WEM Administration Training

This course builds on the fundamental implementation and administration abilities by introducing scalability, redundancy, and security setups. It is intended for seasoned IT workers.

CEM-205 Manage Citrix Endpoint Management Training

CEM-205 Manage Citrix Endpoint Management Training introduces Citrix Endpoint Management to professionals and teaches them the proper ways to manage it.

CXM-303 Deploying Enterprise Mobility Solutions with Citrix Endpoint Management Training

CMX-303 Deploying Enterprise Mobility Solutions with Citrix Endpoint Management Training is a five-day technical program that engages you with enterprise mobility management (EMM) to gain information about Citrix Endpoint Management.

CXS-301 Citrix XenServer 7.1 LTSR Administration Training

CXS-301 Citrix XenServer 7.1 LTSR Administration Training is specially developed to help professionals learn to install, secure, manage, troubleshoot, and size an enterprise XenServer implementation.

CNS-230 Deploy and Manage Citrix SD-WAN Essentials Training

CNS-230 Deploy and Manage Citrix SD-WAN Essentials Training introduces professionals to the different SD-WAN deployment and implementation modes. It also teaches them the right way to select one that suits their organization.

NetApp

Basic NetApp Configuration and Administration (BNCA) Training

Leverage Basic NetApp Configuration and Administration Training (BNCA) course and get in-depth knowledge and a technical overview of the essential features and advantages of NetApp ONTAP 9 data management software.

ONTAP Cluster Administration (ONTAP9ADM) Training

The ONTAP Cluster Administration (ONTAP 9.6) (ONTAP9ADM) Training is an instructor-led training course that gives hands-on experience and lecture on the basic administration jobs of an ONTAP 9.6 cluster.

ONTAP Cluster Administration and Data Protection Bundle (CDOTDP9) Training

This ONTAP Cluster Administration and Data Protection Bundle (CDOTDP9) Training course is a five days training course, wherein 3 days are committed to ONTAP Cluster Administration (ONTAP9ADM), while, the remaining 2 days are committed to ONTAP Data Protection Administration (DATAPROT9).

ONTAP Troubleshooting (CATSP) Training

The ONTAP Troubleshooting (CATSP) Training is a Partner-only course. Through this course, you will improve your expertise as a NetApp® ONTAP® software engineer by learning how to troubleshoot ONTAP environs.

StorageGRID Administration (SGWSADM) Training

This StorageGRID Administration (SGWSADM) Training course includes the fundamentals of StorageGRID administration. In this course, you will learn how to use the Grid Manager for inspecting and handling a StorageGRID Webscale 11.1 system.

Administration of Active IQ Unified Manager ONTAP (AOCMCDOT) Training

In the Administration of Active IQ Unified Manager ONTAP (AOCMCDOT) Training course, you will learn how to set up and manage NetApp® Active IQ® Unified Manager (previously OnCommand® Unified Manager) & to fit Unified Manager with the OnCommand Workflow Automation (OnCommand WFA) data management solution.

Element Software Administration (SFSA) Training

This Element Software Administration training is a 2-day instructor-led training. This course helps you understand the basic administration of a NetApp Element software cluster in a SolidFire system.

ONTAP Data Protection Administration (ONTAP 9.6) (DATAPROT9) Training

The ONTAP Data Protection Administration (ONTAP 9.6) (DATAPROT9) Training course was mainly designed to educate about the core techniques and concepts to protect data in NetApp ONTAP systems.

Protecting SQL Server (PROTSQL) Training

The Protecting SQL Server (PROTSQL) Training course is mainly for NetApp Customers, NetApp and NetApp Partner Professional Services, and Systems Engineers.

SnapCenter Administration (SCADMIN) Training

SnapCenter Administration Training (SCADMIN) course includes the SnapCenter Software 4.0 release deployment. In this course, you will learn comprehensive way to install, monitor, and manage SnapCenter Server & SnapCenter Plug-ins.

Protecting VMware vSphere (PROVMVSP) Training

The Protecting VMware vSphere (PROVMVSP) Training course allows you to learn about the use and deployment of the SnapCenter Plug-in for VMware vSphere.

ONTAP Compliance Solution Administration (OCSA) Training

The ONTAP Security and Compliance Administration (OCSA) Training course explains the functionality and architecture of the integrated data protection security and compliance traits and advantages in ONTAP 9 data-management software, counting SnapLock software, encryption technologies, and core management features.

ONTAP MetroCluster Installation (MCCIIW) Training

MetroCluster software is an exclusive highly-accessible and disaster-recovery solution. In this ONTAP MetroCluster Installation (MCCIIW) Training course, you will understand how to cable and set up a MetroCluster environment.

Configuring and Monitoring NetApp E-Series and EF-Series Storage Systems (CMESERIES) Training

Pursue Configuring and Monitoring NetApp E-Series and EF-Series Storage Systems (CMESERIES) Training course; you will learn how to propose configurations based on a pre-deployment evaluation for a new NetApp EF-Series or E-Series storage system.

Data ONTAP SAN Implementation (SANIMP) Training

Leveraging this Data ONTAP SAN Implementation (SANIMP) Training workshop course will allow you to learn the ways to connect Linux® and Windows® hosts to NetApp® SANs via iSCSI and FC protocols.

OnCommand Insight: Business Insights (OCIBI) Training

In this OnCommand Insight: Business Insights (OCIBI) Training course, you will become familiar with a series of significant characteristics of OnCommand® Insight for the everyday managing, observation, plus troubleshooting of data infrastructures.

OnCommand Insight: Intelligent Operation (OCIIO) Training

The OnCommand Insight: Intelligent Operation (OCIIO) Training course allows you to get insights with some significant characteristics of OnCommand Insight relevant to the day-to-day management, monitoring, and trouble-shooting of data infrastructures.

ONTAP Performance Analysis (PERFCDOT) Training

Leverage the ONTAP Performance Analysis (PERFCDOT) Training course and grab skills and knowledge that you will require to gather and analyze system performance information from NetApp storage systems that run clustered Data ONTAP 9.

OnCommand Insight: Implementation (OCIIMP) Training

OnCommand Insight: Implementation (OCIIMP) Training course is a comprehensively lab-based and lecture-based course that allows you to learn how about the installation and configuration of OnCommand Insight.

Managing NAS and Performance on Clustered Data ONTAP (NASPAD) Training

Managing NAS and Performance on Clustered Data ONTAP (NASPAD) Training course at Microtek Learning is a blend of SMB (CIFS), ONTAP NFS Administration (NFSAD), and performance analysis courses into a solitary, in-depth one-week course.

ONTAP NFS Administration (NFSAD) Training

This ONTAP NFS Administration training course reviews NFS and in a descriptive way, varied NFS versions and the characteristics of ONTAP 9 software supporting the NFS protocol.

ONTAP SMB Administration (CIFSAD) Training

ONTAP SMB Administration (CIFSAD) Training is a 1-day training course that broadens the CIFS info present in the ONTAP Cluster Administration course.

Implementing VMware vSphere on ONTAP (IMPVMWAR) Training

In the specialized Implementing VMware vSphere on ONTAP (IMPVMWAR) Training course you will get to know about the way to employ NetApp's Virtual Storage Console by setting up, maintaining, and securing a VMware virtual infrastructure in both NAS and SAN environs utilizing ONTAP Data Management Software.

VMware vSphere on NetApp (VVNA) Training

In this VMware vSphere on NetApp (VVNA) Training, you will learn varied techniques to execute VMware vSphere 7.0u3 on NetApp ONTAP 9.11.

Implementing Microsoft Hyper-V on Data ONTAP (IMPMSHV) Training

Implementing Microsoft Hyper-V on Data ONTAP (IMPMSHV) Training course allows you to learn how to execute MS Hyper-V virtualization solutions on NetApp® Data ONTAP® 7-Mode and clustered Data ONTAP.

Designing the FlexPod Solution (FPDESIGN) Training

The Designing the FlexPod Solution (FPDESIGN) Training course demonstrates you how to access the FlexPod solution design process concerning the contemporary data center obstacles.

Implementing and Administering the FlexPod Solution (FPIMPADM) Training

Implementing and Administering the FlexPod Solution (FPIMPADM) Training provide knowledge to the system and network engineers and administrators for setting up, configure, and administer the FlexPod architecture.

Integrating Hybrid Clouds with NetApp Data Fabric (INTHCDF) Training

Through the Integrating Hybrid Clouds with NetApp Data Fabric (INTHCDF) Training course, you will learn how to execute a hybrid cloud solution making use of the NetApp Data Fabric.

Integrating Hybrid Clouds with Microsoft Azure (UNCMMAZ) Training

Learn to implement a hybrid cloud solution with Microsoft Azure by using NetApp® Cloud Volumes ONTAP®. Connect an Azure Virtual Network (VNet) and an on-premises data center to unify your infrastructure.

Hortonworks

HDP Operations: Administration Foundations Training

The HDP Operations: Administration Foundation Training is recommended for system administrators who are responsible for the installation, management, and configuration of the Hortonworks Data Platform (HDP).

HDP Overview Apache Hadoop Essentials Training

This training provides a brief technical introduction to Apache Hadoop. It also covers HLL information about the operation, architecture, concepts, and utilization of HDP and the Hadoop ecosystem.

HDF NiFi Flow Management Training

This training is intended for Data Flow Managers or Data Stewards who are seeking to systematize the flow of data between systems.

HDP Operations Hadoop Administration 2 Training

This training is recommended for Administrators having good experience in managing HDP platform clusters with Ambari.

HDP Operations: Security Training

This training is recommended for Administrators having good experience in implementing secure Hadoop clusters by utilizing authorization, authentication, data protection and auditing strategies.

HDP Developer Quick Start Training

This HDP Developer Quick Start Training is recommended for developers who know how to create apps in analyzing Big data stored in Apache Hadoop by utilizing Apache Hive and Apache Pig.

HDP Developer Apache Pig and Hive Training

This training is recommended for developers who know how to create apps in analyzing Big data stored in Apache Hadoop by utilizing Hive and Pig.

HDP Analyst Apache HBase Essentials Training

Professionals who want to utilize the HBase NOSQL Database which operates on top of HDFS providing real-time write/read access to sparse datasets can sign up for this training.

HDP Developer: Apache Spark 2.3 Training

This training provides you the knowledge about Apache Spark distributed computing engine which is appropriate for developers, technical managers, architects, data analysts and any learner who want to utilize Spark.

HDP Analyst Data Science Training

With the help of machine learning and natural language processing, this course will train students on the principles and methods of data science.

Tableau

Tableau Desktop I: Fundamentals Training

This technical course familiarizes professionals with Tableau 10 new features and teaches them how to create advanced-level dashboards and visualizations in Tableau.

Tableau Desktop II: Intermediate Training

Tableau Desktop Level 2: Intermediate Training contains a detailed overview of the more complex features of Tableau. It helps professionals who have a fundamental knowledge of Tableau gain more advanced information and become Tableau power users.

Tableau Desktop III: Advanced Training

Tableau Desktop Level 3: Advanced Training is for experienced Tableau users who want to gain more knowledge regarding the leading practices for distributing information and insights.

Tableau Desktop I & II: Accelerated Training

This training helps the candidates understand Tableau training who are succeeding in a moving class and choose to take up the new speed of technology.

Tableau Server Administration Training

You will learn the leading practices for administering and installing Tableau Server and the essential information on security, scalability, performance, and governance.

Tableau Server Architecture Training

The skills and knowledge gained are the best for those who are administering and architecting a complex or large deployment of Tableau Server or a counselor who will be involved in the various deployments of Tableau Server.

Tableau Site Administration Training

Tableau Site Administration training gives you the skills required to operate an efficient and successful Tableau site.

Tableau Advanced Analytics with R Training

Tableau Advanced Analytics with R Training is developed for professional data visualization users who want to shift into data science and analytics to improve their business by equipping the analytical ability of R and the unique visualization capabilities of Tableau.

Tableau Prep I Training

This training is for those who have at least 3 to 6 months of experience in Tableau Desktop and are knowledgeable about writing calculations.

Tableau Visual Analytics Training

Tableau Visual Analytics training will teach you the best practices for sharing insights and information with others. This Visual Analytics training helps you create a visualization that others can easily use and understand.

Veeam

10972: Administering the Web Server (IIS) Role of Windows Server Training

10972: Administering the Web Server (IIS) Role of Windows Server Training is aimed at professionals to teach them the basic skills and knowledge to manage and configure Internet Information Services.

VASCM-11 Veeam Availability Suite v11: Configuration and Management Training

The Veeam® Availability Suite™ v11: Configuration and Management training course is a three-day, technical deep-dive focused on teaching IT professionals the skills to configure, manage, and support a Veeam Availability Suite v11 solution.

VBR-V11-AD Veeam Backup & Replication V11: Architecture and Design Training

The two-day, Veeam® Backup & Replication™ v11: Architecture and Design training course, is focused on teaching IT professionals how to effectively architect a Veeam solution through attaining technical excellence following the Veeam Architecture Methodology used by Veeam's own Solution Architects.

Hadoop

Introduction to Hadoop Administration Training

Introduction to Hadoop Administration Training is designed to help professionals develop a conceptual understanding of all the important steps to maintain and operate a Hadoop cluster.

CWNP

Certified Wireless Network Administrator (CWNA)

This CWNA certification is basically foundational level WiFi certification for the CWNP Certification Program.

Certified Wireless Design Professional (CWDP) Training

CWDP, recognized as professional certification basically designed for networkers or professionals who are already certified in CWNA.

Certified Wireless Security Professional (CWSP) Training

In this training course you will learn about advanced techniques of WLAN covering attacked methods and intrusion techniques.

Certified Wireless Analysis Professional (CWAP) Training

This Certified Wireless Analysis Professional certification is one of the advanced Wireless LAN certifications which has a deep focus on troubleshooting and analysis of wireless LAN systems.

HL7

HL7® Fundamentals Training

Become the team's go-to HL7 expert and assist your company in deciding whether, when, and how to deploy the technology.

HL7 FHIR® Exam Prep Training

Become the team's go-to FHIR expert and assist your company in deciding whether, when, and how to deploy the technology.

HL7 FHIR® Training

This course is for FHIR programmers, interface developers and dedicated Implementers and is designed to provide the skills for the analysis testing, problem tracking and activation of phases of a FHIR project.

Palo Alto

Firewall Essentials: Configuration and Management (EDU-210) Training

This Palo Alto Networks Firewall 10.0 Essentials: Configuration and Management (EDU-210) training course is a 5-day Instructor-Led Training that will support you in the following ways:

Firewall: Optimizing Firewall Threat Prevention (EDU-214) Training

This Firewall: Optimizing Firewall Threat Prevention (EDU-214) Training is basically a 4-day Instructor-Led Training that accentuates the PAN-OS threat prevention capabilities.

Firewall: Troubleshooting (EDU-330) Training

The Palo Alto Networks Firewall 11.0 Troubleshooting course is three days of instructor-led training that will help you:

Panorama: Managing Firewalls at Scale (EDU-220) Training

This Palo Alto Networks Panorama 10.0 : Managing Firewalls at Scale (EDU-220) is a two day instructor-led training that will support you:

Prisma Access SASE Security: Design and Operation (EDU-318) Training

This Prisma Access SASE Security: Design and Operation (EDU-318) course elaborates about Prisma Access Secure Access Service Edge (SASE).

Prisma SD-WAN: Design and Operation (EDU-238) Training

Learn about the next-generation Prisma SD-WAN solution, the advantages it has over traditional WAN and SD-WAN deployments, and how to set it up, manage it, and fix problems in EDU-238: Prisma SD-WAN Design and Operation.

Cortex XDR: Prevention, Analysis, and Response (EDU-260) Training

The course begins with an introduction to the Cortex XDR components and then proceeds to the Cortex XDR management dashboard, where you will learn how to configure security profiles and rules, as well as install agents on your endpoints

Cortex XDR: Investigation and Response (EDU-262) Training

This instructor-led training shows you how to use the Cortex XDR management console's Incidents pages to look into assaults. It defines causality chains, alerts versus logs, the Analytics Engine's detectors, log stitching, and the ideas of analytics and causation.

Python

Python For Data Science Primer Training

Microtek Learning's Python for Data Science Primer technical training introduces data analysts, business analysts, and anyone interested in data science to the Python programming language.

JumpStart To Python For Data Science Training

JumpStart to Python for Data Science is a training program that is growing a new knowledge domain very vastly. In this course, professionals will learn to solve core data science problems using Python.

Introduction to Python Programming Training

This technique familiarizes you with the programming best practices and helps you learn to store and represent data with the help of Python data types and variables.

Mastering Python Programming Training

Mastering Python Programming Training is developed to help professionals take their fundamental knowledge of running and writing Python scripts to the next level.

Advanced Python Programming Training

Advanced Python Programming Training is an in-depth technical course that helps professionals become experts at Python. It teaches you how to utilize advanced concepts to create real-time and advanced applications based on Python.

Applied Python for Scientists and Engineers Training

Applied Python for Scientists and Engineers Training provides in-depth knowledge of Applied Python for professionals who have a basic understanding of Python Programming.

Data Science with Python Training

This technical course teaches you to operate on different Python libraries like NumPy, SciPy, and Lambda functions to name a few.

Python Basics Training

This program will help professionals know about the conditional execution and iterations of Python as control structures.

Introduction To Python Programming For Security Analysts & Professionals Training

Microtek Learning's Introduction to Python Programming for Security Analysts training program offers a boost to the career of all security professionals.

Python Programming Essentials Training

Python Programming Essentials is a training program that enables professionals to solve a real-life problem. The course is for beginners. Learning the course will lead to professionals' careers as they will learn about programming in Python.

Next-Level Python Programming (With Advanced Python Topics) Training

In this course, professionals will learn how to create modules, run unit tests, leverage OS services, query databases, define classes, code graphical application interfaces, interact with network series, and process XML data.

Essential Python Training

Microtek Learning's Essential Python course was designed to be compact, easy to extend, and easy to use. This course has a very active development community with an extensive standard library.

APIs And API Design With Python Training

Microtek Learning's APIs and API Design with Python technical training enable professionals to solve real-life problems and issues.

TTAML0002 Building Recommendation Systems With Python Training

Recommendation Systems with Python provide good recommendations regarding groceries, friends, and movies, enticing customers to use their platform and define the user experience.

TTEP100 Introduction to Perl Scripting Introduction Training

TTEP100 Introduction to Perl Scripting Introduction Training familiarizes professionals with the Perl programming language and helps them solve common issues.

TTPS 4925 Perl Programming Essentials Training

TTPS 4925 Perl Programming Essentials Perl Training focuses on the core Perl concepts and teaches professionals about the most effective techniques currently being used in the web development world.

TTPS 4926 Advanced Perl Programming Training

TTPS 4926 Advanced Perl Programming Training provides comprehensive knowledge of advanced Perl coding tools that takes professionals from beginner to expert level.

TTPS4824 Python For Networking & System Administrators Training

Python For Networking & System Administrators technical training program is mainly for the network administrator. This is an introductory course that is beyond the practical level.

<u>Aruba</u>

Airwave Wireless Management Suite Installation, Configuration And Use (AICU) Training

In this AICU training, you will gain experience along with knowledge in installing and utilizing the AirWave Wireless Management Suite.

Aruba Switching Fundamentals For Mobility Rev. 16.41 Training

The training helps you to gain basic skills and knowledge which are needed to manage and configure modern, open standard network solutions.

Aruba Clear Pass Essentials Training

This five-day course covering labs and modules will teach participants about fundamental features of the ClearPass Portfolio.

<u>Google</u>

Introduction to Google Analytics Training

Introduction to Google Analytics Training is designed to help individuals develop a better understanding of all the features of Google Analytics. This technical course teaches you the right ways to leverage Google Analytics features more effectively to enhance your business

Introduction to Google AdWords Training

This technical course teaches you the right ways to set up your Google AdWords accounts and the theories behind more profitable online advertising, including keyword introduction, how to utilize them efficiently, and how to enhance quality score.

Google Analytics And AdWords Combo Training

Google Analytics and AdWords Combo Training is a comprehensive blend of both Google Analytics and Google AdWords Training. It contains in-depth knowledge of Google Analytics and Google AdWords features and work structure.

Data Science

DP-100T01: Designing and Implementing a Data Science Solution on Azure Training

This technical course enhances and supports one's current knowledge of machine learning and Python to manage data preparations and ingestions, model training, and launch machine learning solution inspection in Microsoft Azure.

HDP Analyst Data Science Training

With the help of machine learning and natural language processing, this course will train students on the principles and methods of data science.

Python For Data Science Primer Training

Microtek Learning's Python for Data Science Primer technical training introduces data analysts, business analysts, and anyone interested in data science to the Python programming language.

JumpStart To Python For Data Science Training

JumpStart to Python for Data Science is a training program that is growing a new knowledge domain very vastly. In this course, professionals will learn to solve core data science problems using Python.

Data Science with Python Training

This technical course teaches you to operate on different Python libraries like NumPy, SciPy, and Lambda functions to name a few.

Practical Data Science with R Training

Practical Data Science with R (PDSwR) is the course to start with if you are starting as a data scientist or aspire to be one. If you already practice data science, PDSwR will fill in knowledge gaps and even give you a new perspective on the technologies you now employ.

Practical Data Science with Python Training

This course uses several graphs and visuals to explain all fundamental Data Science principles and their applications rather than complex mathematical calculations.

Data Analytics Course

You can learn Power BI, Data Wrangling, Data Mining, and other skills by taking this Microtek Learning course on data analytics. Through current projects and case studies, gain knowledge from industry experts. Sign up for this course to become certified in data analytics.

SAP

SAP Overview Training

This course provides an overview of SAP applications and components, with a focus on business processes within SAP ERP.

SAP Financial Closing in SAP S/4HANA Training

You will learn in this course the steps involved in an SAP S/4HANA system's financial closing process, its integration flow, and the necessary customizations.

SAP BW/4HANA Data Warehousing Training

The course provides an introduction to SAP BW/4HANA and helps students build their foundational knowledge. It explains and produces information providers like CompositeProviders, Open ODS Views, and DataStore Objects (advanced).

SAP BW/4HANA Modeling Training

Users with some BW/4HANA experience or users who have taken BW410 and are familiar with the BW/4HANA terminologies and fundamental data warehousing tasks should enroll in this course.

SAP BW/4HANA Query Design and Analysis Training

This course gives an introduction to SAP BW/4HANA as well as in-depth expertise for designing BW queries in both SAP BW/4HANA and SAP BW powered by SAP HANA.

SAP BW/4HANA Data Acquisition Training

Customers and consultants of SAP BW/4HANA can provide (load, replicate) data into SAP BW/4HANA with the help of this course. It emphasizes BW/4HANA's streamlined data flow and data provision strategies that directly target the underlying SAP HANA database.

Integrated Business Processes in SAP S/4HANA Training

In order to be properly prepared for the certification exam, participants should reserve extra hours of self-study to review the course materials in more detail.

Basics of Customizing for Financial Accounting: GL, AP, AR in SAP S/4HANA Training

The training gives a general overview of how to use SAP S/4HANA's Financial Accounting capabilities to meet the necessary business needs.

Additional Financial Accounting Configuration in SAP S/4HANA Training

In this course, you will learn how to set up and utilize the accounts payable and accounts receivable automation functionalities of SAP S/4HANA.

Cost Center and Internal Order Accounting in SAP S/4HANA Training

Participants of this course will learn to configure and use the fundamental business processes and tasks of Cost Center and Internal Order Accounting with SAP S/4HANA.

Product Cost Planning in SAP S/4HANA Training

Participants of this course will gain an overview of the fundamental business processes and tasks of product cost planning with SAP S/4HANA.

Profit Center Accounting in SAP S/4HANA Training

Participants of this course will gain an overview of the fundamental business processes and tasks of profit center accounting with SAP S/4HANA.

Profitability Analysis in SAP S/4HANA Training

Participants of this course will learn to configure and use the fundamental business processes in Profitability Analysis in SAP S/4HANA, both Margin Analysis and CO-PA Costing-based.

Business Processes in Financial Accounting in SAP S/4HANA Training

Participants of this course will gain an overview of the Financial Accounting capabilities of SAP S/4HANA. You will learn how SAP S/4HANA covers the Financial Accounting related business requirements and how the fundamental business processes and tasks are executed in the system.

Financial Accounting in SAP S/4HANA for SAP ERP FI Professionals Training

The course provides an overview of the Financial Accounting capabilities that are new or different in SAP S/4 HANA compared to SAP ERP.

Implementing SAP S/4HANA Finance for Group Reporting Training

Participants will learn how to configure consolidation from the ground up in an end-to-end scenario. Financial statement items, consolidation units and other master data will be discussed.

Conversion of Accounting to SAP S/4HANA Training

This course provides an in depth look at the process for a conversion of the financial components to SAP S/4HANA.

Financial Accounting in SAP S/4HANA - Academy Part I Training

The Financial Accounting in SAP S/4HANA academy is designed for recent consultants who wish to learn Financial Accounting in SAP S/4HANA thoroughly and pass the certification exam.

Financial Accounting in SAP S/4HANA - Academy Part II Training

Participants should set aside additional time for self-study to thoroughly go through the course materials in order to be well prepared for the certification exam.

Management Accounting in SAP S/4HANA - Academy Part I Training

The Management Accounting in SAP S/4HANA academy is designed for new consultants who want to learn in-depth information about Management Accounting in SAP S/4HANA and demonstrate this knowledge by being certified.

Management Accounting in SAP S/4HANA Academy Part II Training

The Management Accounting in SAP S/4HANA academy is aimed towards new consultants who want to obtain a broad and deep knowledge of Management Accounting in SAP S/4HANA and prove this by attaining certification.

Business Processes in Treasury and Risk Management in SAP S/4HANA Training

This course provides an overview of the Treasury and Risk Management capabilities of SAP S/4HANA. You will learn how SAP S/4HANA supports the main business processes and how to execute these in the system.

Management Accounting in SAP S/4HANA for SAP ERP CO Professionals Training

The course provides an overview of the Management Accounting capabilities in SAP S/4HANA compared to SAP ERP.

Financial Accounting in SAP S/4HANA - Academy Part I Training

The Financial Accounting in SAP S/4HANA academy is designed for recent consultants who wish to learn Financial Accounting in SAP S/4HANA thoroughly and pass the certification exam.

Invoice Verification in SAP S/4HANA Training

In this course, participants become familiar with logistics invoice verification as the final step in the external procurement process.

Customizing in Cash Management in SAP S/4HANA Training

You will learn how SAP S/4HANA covers Cash Management related business requirements and how the business processes are executed in the system.

Business Processes in Management Accounting in SAP S/4HANA Training

Participants of this course will gain an overview of the fundamental business processes and tasks of Management Accounting with the SAP S/4HANA application.

Asset Accounting in SAP S/4HANA Training

You will receive a comprehensive introduction to SAP S/4HANA's Asset Accounting settings and procedures in this course.

Cost Object Controlling in SAP S/4HANA Training

Participants of this course will gain an overview of the fundamental production scenarios and its integration to Cost Object Controlling with SAP S/4HANA.

Business Processes in SAP S/4HANA Sourcing and Procurement Training

This course provides a comprehensive overview of the business processes in SAP S/4HANA Sourcing and Procurement. You will learn about the fundamentals, major business processes and functions.

Custom Code Migration from SAP ERP to SAP S/4HANA Training

To attend this course, you require prerequisite knowledge about ABAP Development in general and ABAP Programming for SAP HANA.

New General Ledger Accounting (in SAP ERP) for SAP S/4HANA Adopters Training

This course covers the common scope of New General Ledger Accounting valid for SAP ERP and SAP S/4HANA systems.

SAP BusinessObjects Web Intelligence 4.3: Report Design I Training

You will learn the skills necessary to use SAP BusinessObjects Web Intelligence to access, analyze, and exchange information during this two-day training.

SAP BusinessObjects Business Intelligence Platform: Designing and Deploying a Solution Training

This course is aimed at experienced BI system architects, solution architects, and system administrators responsible for designing and deploying SAP Business Objects BI 4 solutions for their organization but is also open to anyone interested in this topic.

SAP BusinessObjects Web Intelligence 4.3: Report Design II Training

You will learn how to use advanced Web Intelligence features after taking this two-day course.

SAP Crystal Reports: Fundamentals of Report Design

By attending this course, you will be able to plan, design and distribute a Crystal Report. You will also gain better knowledge and understanding of the Crystal Reports Design interface.

SAP Crystal Reports: Business Reporting and Report Processing Strategies Training

By attending this course, you will be able to plan, design and distribute a Crystal Report. You will also gain better knowledge and understanding of the Crystal Reports Design interface.

Project Management

PMP Certification Training

This PMP Certification Training will assist you in developing your skills and knowledge to give you a competitive advantage in the project management industry. It will also assist you in preparing for and passing the PMP Certification exam.

Certified Associate In Project Management (CAPM)® Certification Training

By obtaining a CAPM certification, you can include project management expertise into your existing position, take on more responsibility, oversee bigger projects, and improve the quality of your work by implementing CAPM's defined standards!

Cybersecurity

AZ-500T00: Microsoft Azure Security Technologies Associate (Security Engineer) Training

AZ-500T00: Microsoft Azure Security Technologies Associate (Security Engineer) Training is aimed at professionals to help them gain the skills and knowledge required to maintain the security posture, implement security control and recognize and remediate vulnerabilities with the help of various security tools.

CompTIA Cloud+ Training

The intention of this course is the development of cloud computing skills for professionals to manage IT workloads and ensure complete integration of products and services from different sectors.

CompTIA PenTest+ Training

CompTIA PenTest+ Certification Prep (Exam PT0-002) Training course is an excellent option for the cybersecurity professionals who need to perform tasks of identifying, exploiting, reporting, and managing the vulnerabilities for any network.

20744: Securing Windows Server 2016 Training

20744: Securing Windows Server 2016 Training is aimed at professionals to teach them the leading methodologies to elevate the security level of the IT framework that they administer.

CompTIA Security+ Training

CompTIA Security+ Training allows aspirants to gain valuable information for the implementation and maintenance of information security via a vendor-neutral format.

CompTIA Advanced Security Practitioner (CASP+)

CompTIA Advanced Security Practitioner (CASP+) Certification Prep (Exam CAS-004) Training helps you gain details on information security to take your career to the next level.

CompTIA Cybersecurity Analyst (CySA+) Training

Microtek Learning's proactive course model helps professionals gain knowledge of cybersecurity analysts' duties who can efficiently monitor and detect security incidents through information systems to respond with immediate effect.

CEH - Certified Ethical Hacker v12 Training

In this online course for ethical hacking certification, you will learn advanced methods for network packet analysis and system penetration testing that will help you strengthen your network security knowledge and resist hackers. You will get access to certified experts who can help you at every step of the learning process.

CND - Certified Network Defender Training

Our EC-Council-certified instructors give students a more profound understanding of network protocol, security protocol, VPN and firewall configuration, network analysis, and scanning for possible vulnerabilities.

CHFI - Computer Hacking Forensic Investigator v10

The CHFI: Certified Hacking Forensic Investigator training course is a completely ANSI-accredited and lab-focused program. This CHFI training is vendor-neutral training in digital forensics.

EC-Council Certified Security Analyst (ECSA) V10

EC Council Certified Security Analyst (ECSA) V10 Training program equips the IT professionals with adequate knowledge ranging from Social Engineering Pen-Testing to Penetration reporting and Pen testing methodologies.

CISA - Certified Information Systems Auditor

CISA - Certified Information Systems Auditor Prep Course Training provides you with comprehensive coverage on all the CISA exam domains offered by the ISACA.

CISM - Certified Information Security Manager

CISM - Certified Information Security Manager Prep Course Training is designed to help people develop a good understanding of the relationship between information security programs and broader organizational objectives.

CSX Cybersecurity : Cybersecurity Fundamentals Training

Cybersecurity Fundamentals Training is developed for professionals with an extensive understanding of the principles that define and frame cybersecurity.

CRISC Prep Course Training

In this course, you'll cover all four domains of the ISACA Certified in Risk and Information Systems Control (CRISC) exam and gain the knowledge and concepts required to obtain CRISC certification.

IBM

IBM Cognos Analytics: Author Active Reports (v11.0)

IBM Cognos Analytics: Author Active Reports (v11.0) Training is developed to help professionals gain in-depth knowledge of Active Report content and functionality in the IBM Cognos Analytics 11.

IBM Cognos Analytics: Author Reports Advanced (v11.0.x)

IBM Cognos Analytics: Author Reports Advanced (v11.0.x) Training introduces Professional Reports to advanced report-building techniques with dimensional data, relational data models, and ways to enhance, manage, customize, and distribute professional reports.

IBM Cognos Analytics: Author Reports with Multidimensional Data (v11.0) Training

IBM Cognos Analytics: Author Reports with Multidimensional Data (v11.0) Training is designed to help report authors build their expertise with IBM Cognos by implementing dimensional techniques to reports.

IBM Cognos Analytics: Enterprise Administration (V11.1.x)

IBM Cognos Analytics: Enterprise Administration (V11.1.x) Training provides in-depth knowledge and detailed explanation of the basic concepts of installing and configuring IBM Cognos and administering content and servers in a distributed environment.

IBM Cognos Framework Manager: Design Metadata Models (V11.1.x) Training

IBM Cognos Framework Manager: Design Metadata Models (V11.1.x) Training introduces professionals to the advanced knowledge of metadata modeling concepts.

IBM Cognos Analytics: Author Reports Fundamentals (v11.0.x) Training

IBM Cognos Analytics: Author Reports Fundamentals (v11.0.x) Training contains a detailed explanation of report-building techniques by utilizing relational data models.

IBM Cognos Analytics: Author Reports Advanced (V11.1.x)

IBM Cognos Analytics: Author Reports Advanced (V11.1.x) Training is aimed at experienced authors to teach them advanced report building techniques to improve, manage, customize, and distribute reports.

IBM Cognos Analytics: Author Reports Fundamentals (V11.1.x) Training

IBM Cognos Analytics: Author Reports Fundamentals (V11.1.x) Training is developed to help professionals build reports using Cognos Analytics.

IBM SPSS Modeler Foundations (V18.2) Training

IBM SPSS Modeler Foundations (V18.2) Training is designed to help professionals develop a better understanding of the foundations of IBM SPSS Modeler.

IBM Cognos Analytics: Enterprise Administration (v11.0.x)

IBM Cognos Analytics: Enterprise Administration (v11.0.x) Training contains in-depth information and comprehensive knowledge of basic concepts of configuring and installing IBM Cognos Analytics, and administering servers and content in a distributed environment.

IBM SPSS Statistics Essentials (v25) Training

IBM SPSS Statistics Essentials (v25) Training is aimed at professionals to learn more about the fundamentals of using IBM SPSS Statistics for the classic data analytics process.

IBM Cognos Framework Manager: Design Metadata Models (v11.0.x) Training

IBM Cognos Framework Manager: Design Metadata Models (v11.0.x) Training is developed for professionals to get familiar with foundational to advanced knowledge of metadata modeling concepts.

FileNet P8 Platform Administration (V5.5.x) Training

FileNet P8 Platform Administration (V5.5.x) Training contains in-depth knowledge of the administration and configuration of an IBM FileNet P8 Platform 5.5x system.

Db2 12 for z/OS SQL Performance and Tuning Training

Db2 12 for z/OS SQL Performance and Tuning Training is aimed at professionals to teach them the leading methodologies to prevent SQL performance problems.

Db2 12 for z/OS Introduction to System Administration

Db2 12 for z/OS Introduction to System Administration Training is designed to introduce professionals to the knowledge and skills required to administer a Db2 12 for z/OS system.

Db2 12 for zOS Advanced Database Administration

Db2 12 for zOS Advanced Database Administration Training is developed to help professionals gain comprehensive knowledge about advanced database administration skills, including online schema changes, stored procedures, partition management, and the use of packages.

Db2 12 for z/OS Basic Database Administration

Db2 12 for z/OS Basic Database Administration Training is aimed at professionals to teach them the basics of Database Administration for a Db2 12 for z/OS.

Developing Rule Solutions in IBM Operational Decision Manager V8.9.2 Training

Get a complete overview of the Decision Server and the Decision Center with IBM Operational Decision Manager V8.9.2. The module helps both the technical operators and the business users.

Administration of IBM DataPower Gateway V7.6 Training

IBM DataPower Gateway V7.6 Training module is all about data security, its integration, and its optimization. The training gives you a live demonstration to access the web, web services, mobile applications and services, and API interface and workloads.

IBM Cloud Application Performance Management 8.1.4 Fundamentals Training

In the IBM Cloud Application Performance Management course (TM674G), you learn to go through IBM Cloud Application Performance Management architecture.

Process Implementing with IBM Business Process Manager V8.6 – I Training

The IBM business process management is the environment meant for management personnel, and thus the course modules. IBM Business Process Manager V8.6 provides you with the accessibility of the project authorities

Developing Solutions with IBM Decision Server Insights V8.10 Training

Decision Solutions with IBM Decision Server Insights is a training that discusses and encloses all the rules and events that are available on the platform.

Developing Rule Solutions in IBM Operational Decision Manager V8.10 Training

The Developing Rule Solutions in IBM Operational Decision Manager V8.10 is the introductory course that provides the developers with the detailed walk-through of the IBM Operational Decision Manager platform.

DevOps with Private Cloud on IBM Power Systems: Learn Ansible, Chef, and Puppet Training

DevOps with Private Cloud on IBM Power Systems is a dedicated training course designed for developers and operators. The integration and the collaboration of this personnel is quite an old job; the platform, however, is not.

IBM Spectrum Protect version 8.1.6 Implementation and Administration Training

IBM Spectrum Protect 8.1.6 is a training module designed to help admins with data backup and recovery solutions. The course focuses on the implementation and administration of an IBM Spectrum Protect environment.

IBM MQ V9.1 System Administration Training

This course teaches you how to customize, operate, administer, and monitor IBM MQ on-premises on distributed operating systems.

AWS

Architecting on AWS Accelerator Training

Architecting on AWS Accelerator Training focuses on educating people about the appropriate method to architect for the AWS Cloud.

Advanced Developing on AWS Training

Advanced Developing on AWS Training comprises various of advanced development topics, including deconstructing on-premises legacy applications, architecting for a cloud-based environment, and relocating them into cloud-based architectures.

AWS Technical Essentials Training

AWS Technical Essentials Training introduces professionals to AWS products, services, and common solutions. It helps you learn the basics of recognizing AWS services to easily make an informed decision regarding IT solutions according to your business requirements.

AWS Business Essentials Training

AWS Business Essentials Training is developed to help professionals gain the right information regarding cloud computing and cloud strategies.

AWS-ADV: Advanced Architecting on AWS Training

Advanced Architecting on AWS Training is a comprehensive guide that teaches you Advance Architecture on AWS and helps you prepare for the AWS Certified Solution Architect exam.

AWS-ARC: Architecting on AWS Training

Architecting on AWS Training is designed to introduce professionals to the basics of developing IT infrastructure on the AWS platform.

Migrating to AWS Training

This course covers all the essential aspects, from portfolio discovery, migration planning design to application optimization, and post-migration validation.

AZ-010T00: Microsoft Azure Administration for AWS SysOps Training

This technical course teaches individuals about the principles and tools required to administer Azure. It provides comprehensive information and an in-depth explanation of Azure networking features and identity solutions.

AWS-OPS: Systems Operations on AWS Training

System Operations on AWS Training is created to educate people on configuring, managing, and deploying operations on the AWS platform.

AWS-DEV: Developing on AWS Training

In this technical course, you will discover the leading procedures to interact with AWS with the help of code and talk about critical concepts, troubleshooting tips, and best practices.

DevOps Engineering on AWS Training

DevOps Engineering on AWS Training is developed to help you utilize the combination of DevOps practices, cultural philosophies, and tools to boost your organization's ability to build, develop, and maintain services and applications at high velocity on AWS.

Big Data on AWS Training

Big Data on AWS Training is a comprehensive course that teaches you about cloud-based Big Data solutions, including Amazon Redshift, Amazon EMR, Amazon Kinesis, and the remaining AWS Big Data platform.

Data Warehousing on AWS Training

Data Warehousing on AWS Training contains in-depth knowledge regarding strategies. Concepts, and leading practices required to design a cloud-based data warehousing solution with the help of Amazon Redshift.

Security Engineering on AWS Training

This technical course's main motive is to educate people about the security practices that AWS suggests for improving the protection of your systems and data in the cloud.

AWS-CPE: AWS Cloud Practitioner Essentials Training

AWS Cloud Practitioner Essentials Training is loaded with in-depth information of AWS Cloud, free of specific technical roles.

AWS Security Essentials Training

AWS Security Essentials Training makes professionals familiar with the basic Cloud security concepts, including data encryption methods, AWS access control, and how network access to your AWS framework can be protected.

Architecting on AWS with VMware Cloud Fast Track Training

Architecting on AWS with VMware Cloud Fast Track Training contains an in-depth explanation of AWS capabilities with Architecting on AWS and then including VMware Cloud on AWS.

The Machine Learning Pipeline on AWS Training

The Machine Learning Pipeline on AWS Training demonstrates the methodologies to utilize machine learning pipeline to rectify real business issues in a project-based learning environment.

Planning and Designing Databases on AWS Training

This technical course also contains in-depth knowledge regarding the designing and planning needs of all eight of the AWS database services, their advantages and disadvantages, and the right methods to evaluate which AWS database service is best suited for you.

Exam Readiness Intensive Workshop: AWS Certified Solutions Architect-Associate

This five-day, instructor-led course helps busy architects get away from the day-to-day to get focused and ready for their AWS Certified Solutions Architect – Associate exam.

SolarWinds

SolarWinds Orion 101: Introduction to SolarWinds

This technical course provides comprehensive information about the features and best practices and helps experienced individuals learn advanced configuration options.

Solarwinds Orion 201: System Management & Monitoring Training

SolarWinds Orion 201 Advanced Network Training contains an in-depth overview of SolarWinds modules for the Advanced Network track. This technical course covers SAM, DPA, WPM, NPM, SRM, VMAN, and the SolarWinds App stack views.

Solarwinds Orion 303: Web Help Desk (Installation And Advanced Configuration) Training

SolarWinds Orion 303: Web Help Desk (Installation and Advanced Configuration) Training introduces individuals to the IT Service Management tool and helps them dive into other complex functionalities.

SolarWinds Orion 302: Log and Event Manager Training

SolarWinds Orion 302: Log and Event Manager Training is developed to help professionals gain comprehensive information on areas including LEM agents, LEM appliance deployment, LEM console, rules, filters, and reports.

SolarWinds Orion 202: Advanced Server Training

SolarWinds Orion 202: Advanced Server Training is aimed at professionals who have some experience with the SolarWinds platform and now want to enhance their skills and learn topics such as DPA, SAM, SRM, VMAN, Alerting, Custom SQL, and Reporting. Our enterprise training program is ideal for companies and organizations.

SolarWinds Orion 301: Automation and SDK Training

SolarWinds Orion 301: Database and Automation (Custom reports and Orion SDK) Training is a detailed overview of using the database for custom reporting and alerts.

SolarWinds Platform Administration

Over four days, you'll delve deep into the five core modules, ensuring you have a robust grasp of their features and functionality.

SolarWinds Advanced Platform Administration

This class is tailor-made for seasoned SolarWinds administrators seeking to elevate their expertise. Designed for those with a minimum of one year of hands-on SolarWinds experience or graduates of our SolarWinds Platform Administration class, this class assumes a foundational knowledge of element polling and web console navigation.

SolarWinds Advanced Automation

Ideally suited for students with at least six months of hands-on experience in SolarWinds NPM and/or SAM administration, or those who have successfully completed the SolarWinds Advanced Platform Administration class.

SolarWinds Network Expert

This newly introduced class is tailored for SolarWinds administrators with a strong focus on network management.

SolarWinds Systems Expert

This newly introduced class is meticulously tailored for SolarWinds administrators with a focus on systems. This class extensively covers AppStack and systems-specific modules and topics not typically explored in other classes.

VMware

VMware vSphere: Install, Configure, Manage [V7]

VMware vSphere: Install, Configure, Manage [V7] Training is aimed at professionals to help them gain knowledge regarding installing, managing, and configuring VMware vSphere® 7.

VMware vSphere: Fast Track [V7] Training

This class is tailor-made for seasoned SolarWinds administrators seeking to elevate their expertise. Designed for those with a minimum of one year of hands-on SolarWinds experience or graduates of our SolarWinds Platform Administration class, this class assumes a foundational knowledge of element polling and web console navigation.

VMware vSphere: Optimize and Scale [V7] Training

Through a mix of lecture and hands-on labs, you configure and optimize the VMware vSphere® 7 features that build a foundation for a truly scalable infrastructure, and you discuss when and where these features have the greatest effect.

VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V7] Training

The VMware vSphere v7 training module comprises of VMware administration that offers a complete walkthrough of the VMware vSphere platform, with its optimization and scaling strategies.

VMware vSphere: What's New [V8] Training

In this two-day course, you explore the new features and enhancements following VMware vCenter Server 8.0 and VMware ESXi 8.0.

VMware vSphere: Troubleshooting [V7] Training

VMware vSphere dedicated, and specified troubleshooting workshop covers the skills and knowledge to troubleshoot the VMware quickly and accurately.

VMware vSphere: Design [V7] Training

The training module in VMware vSphere Design Workshop is composed to be pure in understanding and advanced in nature. The basics guide the Design environment on the virtual infrastructure.

VMware vSphere: Install, Configure, Manage [V8]

This five-day course features intensive hands-on training that focuses on installing, configuring, and managing VMware vSphere 8, which includes VMware ESXi 8 and VMware vCenter 8.

VMware vSphere: Troubleshooting [V8] Training

This five-day training course provides you with the knowledge, skills, and abilities to achieve competence in troubleshooting the VMware vSphere® 8 environment.

VMware vSphere: Fast Track [V8] Training

Building on the installation and configuration content from our best-selling course, you will also develop the advanced skills needed to manage and maintain a highly available and scalable virtual infrastructure.

VMware vSphere: Operate Scale and Secure [V8]

You will learn advanced techniques for setting up and managing a highly available and scalable virtual infrastructure throughout this five-day course.

VMware vRealize Automation: Install, Configure, Manage [8.3] Training

VMware vRealize Automation: Install, Configure, Manage Training teaches you to use vRealize Automation to automate the transfer of virtual machines, personalize IT services, and apply it all over different hybrid cloud environments and data centers.

VMware vRealize Operations: Install, Configure, Manage [V8.6] Training

VMware vRealize Operations: Install, Configure, Manage Training covers in-depth information regarding the deployment, management, customization, and overall structure of VMware vRealize.

VMware vRealize Network Insight: Install Configure Manage [V6.1] Training

You will learn how to deploy and manage VMware vRealize® Network InsightTM to ensure an optimised, highly available, and secure infrastructure for your applications during this two-day hands-on training.

VMware vRealize Automation SaltStack Config: Deploy & Manage [V8.4] Training

You will receive the advanced knowledge, abilities, and resources necessary to become proficient in setting up and using VMware vRealize® Automation SaltStack® Config during this three-day hands-on training course.

VMware vRealize Automation: Advanced Features and Troubleshooting [V8.x] Training

In this course, you delve deeper into using vRealize Automation's advanced features to deploy user systems and connect it to other platforms.

VMware vRealize Lifecycle Manager: Install, Configure, Manage [V8.0] Training

The installation, configuration, and management of VMware vRealize® Suite Lifecycle ManagerTM, which includes products like VMware vRealize® OperationsTM, VMware vRealize® Log InsightTM, and VMware vRealize® AutomationTM, are the main topics of this two-day course's hands-on instruction.

VMware vRealize Operations for Operators [V8.6] Training

Users who are in charge of daily management of VMware vRealize OperationsTM should attend this two-day training. With the help of real-world use examples, this course teaches policies, capacity ideas, and workload optimization.

VMware vRealize Automation SaltStack SecOps: Deploy and Manage [V8.6] Training

Learn everything you need to know to become an expert user of VMware vRealize® Automation SaltStack® SecOps in just two days with the help of this comprehensive training course.

VMware vRealize Automation: Troubleshooting [V8.6] Training

Learn all you need to know to troubleshoot VMware vRealize® Automation in this intensive three-day training session.

Data Center Automation with vRealize Orchestrator and vSphere PowerCLI Training

During this five-day course, experienced VMware vSphere® administrators will learn how to take advantage of the powerful automation features that are available to all vSphere users.

VMware Site Recovery Manager: Install, Configure, Manage [V8.2] Training

The VMware site recovery v8.2 training course covers all the administration level management and recovery modules. A short, concise, to the point and expert teaching to the experts, course.

VMware NSX: Install, Configure, Manage Training

VMware NSX: Install, Configure, manage Training is aimed at professionals to teach them how to utilize logical redirecting in VMware NSX to virtualize the environment switch.

VMware NSX-T Data Center: Install, Configure, and Manage [V3.2] Training

The NSX-T Data Center provides a premium level, and dedicated course on the Data Center modules. Learn all the basics, nooks, tricks, and techniques to manage and organize the Data Center.

VMware NSX-T Data Center: Troubleshooting and Operations [V3.2] Training

The VMware NSX-T Data Center: Troubleshooting and Operations [V3.2] certification validates a candidate's expertise in managing and troubleshooting a VMware NSX-T Data Center environment.

VMware NSX Advanced Load Balancer: ICM Plus Troubleshooting And Operations Fast Track

This course covers key NSX Advanced Load Balancer (Avi Networks) features and functionality offered in the NSX Advanced Load Balancer 18.2 release.

VMware Horizon 8: Deploy and Manage Training

VMware Horizon 8: Deploy and Manage is a five-day combination course of VMware Horizon 8: Skills for Virtual Desktop Management & VMware Horizon 8: Infrastructure Administration.

VMware Horizon 7: Install, Configure, Manage [V7.10]

VMware Horizon training is a comprehensive technical training program that will cover the virtual installation of applications on the virtual desktops.

VMware vCloud Director: Install, Configure, Manage [V10.4] Training

This five-day course offers thorough instruction on how to install, setup, and administer a VMware Cloud Director system that is located on-site.

VMware vCloud Director: Tenant Operations [V10.x]

Learn how to set up and manage VMware vCloud Director® for Service Providers 10.x Tenant Operations in this intensive five-day training course.

VMware Cloud Foundation: Planning, Management, Operations [V4.3] Training

The VMware Cloud Foundation: Planning, Management, Operations [V4.3] certification is a credential specializing in the integration and management of VMware's cloud infrastructure.

VMware Cloud on AWS: Deploy and Manage 2021 Training

This four-day, hands-on training course provides you with the knowledge, skills, and tools for deploying and managing a VMware Cloud™ on AWS infrastructure.

Other Trainings

Cisco Application Centric Infrastructure Operations and Troubleshooting (DCACIO)

This course shows you how to manage, monitor, and troubleshoot Cisco® Nexus® 9000 Series Switches in Application-Centric Infrastructure (ACI) mode.

Hands-On Ansible Essentials | Introduction To Automation With Ansible (TTDV7580)

This is a three-day, lab-intensive course geared for toward those responsible for automation of configuration management; consistent and repeatable application deployment; provisioning and deployment of development, testing, and production servers; and (optionally) integration with DevOps CI/CD workflows.

Implementing A CI/CD Pipeline

This three-day, instructor-led, hands-on, technical class provides the solution of how to create an automated CI/CD pipeline that builds, tests, and deploys code every time a developer pushes a code change, ensuring only high-quality and approved code gets deployed.

Building Kubernetes Skills

In this course, we will discuss Kubernetes concepts and architecture of the system, the problems it solves, and the model it uses to handle containerized deployments and scaling.

Certified SAFE Agile Product Manager (APM)

The Agile Product Management course allows you to discover the right mindset, skills, and tools you need to create successful products and solutions using Agile techniques.

LPIC-1 Exam Prep (Course 1) v5.0

The LPIC-1 Exam Prep (Course 1) v5.0 is a certification that validates basic knowledge and skill in Linux system administration.

LPIC-1 Exam Prep (Course 2) v5.0

LPIC-1 Exam Prep (Course 2) v5.0 certification is a globally recognized Linux qualification offered by Linux Professional Institute.

LPIC-1: Linux Administrator

It primarily focuses on essential Linux administration tasks such as system architecture, package management, GNU and Unix commands, file systems, and networking.

LPI BSD Specialist v1.0

This includes its administration, networking, security, and shell scripting. Developed by the Linux Professional Institute (LPI), the certification is sought after by IT professionals specializing in open source solutions.

Web Development Essentials

The Web Development Essentials certification validates a candidate's skills and proficiency in the fundamental concepts and practices of web development. It encompasses the core technologies used in creating websites, such as HTML, CSS, JavaScript, and more.

LPIC-2 Exam 201

The LPIC-2 Exam 201 certification is an advanced-level Linux accreditation, concentrated on the Linux Kernel, system startup, filesystems, and system maintenance.

LPIC-2 Exam 202

The LPIC-2 Exam 202 is a high-level Linux certification offered by the Linux Professional Institute (LPI). It's designed to validate advanced Linux-based system administration and networking knowledge and skills.

LPIC-303: Security v3.0

The LPIC-303: Security v3.0 certification is a globally recognized, advanced-level security certification for IT professionals working with Linux systems.

LPIC-3 Enterprise Virtualization and High Availability

It validates an IT professional's ability to implement, manage, and troubleshoot Linux in enterprise-level networking and system administration.

LPIC-3 Virtualization and Containerization v3.0

It covers important areas including virtualization concepts, tools, and techniques, as well as the installation, configuration, and management of virtualized and containerized Linux systems.

LPIC-3 High Availability and Storage Clusters v3.0

This certification validates that the candidate has the skills required to conceptualize, implement, and maintain network-wide high availability solutions using Linux.

LPIC-3 300: Mixed Environment

The LPIC-3 300: Mixed Environment course is a comprehensive certification for IT professionals who want to learn about heterogeneous networks. It is designed for those who strive for advanced system administration skills in the Linux and Windows systems.

Linux Foundation Certified System Administrator (LFCS)

Linux Foundation Certified System Administrator (LFCS) course will help students to gain skills in the core knowledge required to work as a Linux system administrator in a professional setup.

Fundamentals of Linux

The Fundamentals of Linux certification is a crucial recognition in the IT industry that validates a professional's knowledge and skills in Linux operating systems.

Linux for System Engineers

The Linux for System Engineers certification is a professional credential for IT professionals focusing on Linux operating system. It validates abilities to design, manage, and troubleshoot network services in Linux systems. It covers areas like network settings, system security, domain name servers, web services, file shares, and email services.

Kubernetes Administration and Security (CKA+CKS)

Kubernetes Administration and Security certification, a combination of Certified Kubernetes Administrator (CKA) and Certified Kubernetes Security Specialist (CKS), demonstrate professionals' expertise in the orchestration and security of Kubernetes systems.

Certified Kubernetes Security Specialist (CKS)

The Certified Kubernetes Security Specialist (CKS) certification is a technical assessment designed by the Cloud Native Computing Foundation (CNCF) and The Linux Foundation.

Kubernetes Security Fundamentals

The Kubernetes Security Fundamentals certification verifies a professional's knowledge of securing containerized applications and Kubernetes platforms.

Kubernetes Security Essentials (LFS260)

The Kubernetes Security Essentials (LFS260) certification is a professional qualification that demonstrates proficiency in securing container-based applications and infrastructures.

Kubernetes Administration (LFS458)

The Kubernetes Administration (LFS458) certification is a technical expertise recognition that validates one's ability to design, build, configure, and expose native applications for Kubernetes.

Linux for Cloud Technicians (LFS303)

This certification demonstrates proficiency in cloud management, such as deploying, maintaining, and troubleshooting cloud solutions.

Security and the Linux Kernel (LFD441)

This certification offers proof of expertise in understanding and implementing Linux kernel features like the secure computing mode, Linux security modules, and auditing system.

ORACLE 19C Database Tuning

Oracle 19C Database Tuning is an intermediate level course for Oracle database experienced attendees that explores core tuning skills such as Database parameters, SQL Tuning Advisor, SQL Access Advisor, Adaptive SQL plans and more.

DOI DEVOPS Foundation

The DevOps Foundation course provides a baseline understanding of key DevOps terminology to ensure everyone is talking the same language and highlights the benefits of DevOps to support organizational success.

Junos Enterprise Switching Using Enhanced Layer 2 Software (JEX)

This two-day course provides students with intermediate switching knowledge and configuration examples using Junos Enhanced Layer 2 Software.

Junos Intermediate Routing (JIR)

The course includes an overview of protocol independent routing features, load balancing and filter-based forwarding, OSPF, BGP, IP tunneling, and high-availability (HA) features.

Advanced Junos Enterprise Routing (AJER)

This five-day course is designed to provide students with the tools required for implementing, monitoring, and troubleshooting Layer 3 components in an enterprise network.

Lean Six Sigma Green Belt

The Six Sigma methodology is a business tool used to reduce production variation and introduce heightened control. The Lean methodology focuses on minimizing waste by eliminating non-value-adding processes/procedures and standardizing how activities are conducted.

React JS

React JS is a popular JavaScript library used to build user interfaces (UI) for frontend applications. React is used to build interactive and reactive user interfaces for web applications, allowing developers to create dynamic and powerful websites and applications.

Prompt Engineering for ChatGPT

Prompt Engineering for ChatGPT certification is a recognition that endorses one's skills and competency in creating effective prompts for ChatGPT, an advanced AI language model developed by OpenAI.

Digital Forensics- Network Investigation

Network Forensics is a branch of Digital Forensics that helps collect evidence against cyber criminals and aids in proving their malign intentions. If you want to become a forensic investigator, this network forensics course is the right way forward.

DevOps Leader (DOL)

This certification is all about transforming cultural norms and improving collaboration within teams and between departments, encouraging a culture of continuous learning and agility.

Product Management

This certification validates the holder's ability to develop and create a product vision, manage a product's lifecycle, create go-to-market strategies, and drive product development teams.

Java Full Stack

Java Full Stack course is a comprehensive training program that is designed to give you a complete understanding of both front-end and back-end development using Java.

Introduction to Digital Marketing & Strategizing

The Introduction to Digital Marketing & Strategizing certification provides fundamental knowledge about the utilization of digital tools and platforms for marketing purposes. It acquaints learners with concepts such as social media outreach, SEO, content marketing, email marketing, affiliate marketing, and analytics.

Java Full Stack Web Developer

The Java Full Stack Web Developer certification affirms an individual's proficiency in the journey from the front-end to back-end, involving all stages of software development.

Mastering HTML

The Mastering HTML certification is an acknowledgment of expertise in HTML (HyperText Markup Language), the fundamental language for creating web pages. It validates understanding of structuring and presenting content on the web, such as creating tables, incorporating multimedia, and building forms.
