

## **MB-800T00: Microsoft Dynamics 365 Business Central Functional Consultant**

Duration: 4 Days

### **Course Content:**

Built and optimized for SMEs, Dynamics 365 Business Central is an app for organizations that have outlived their entry-level business apps. Growing businesses often leave behind their legacy enterprise resource planning (ERP) systems or basic accounting software that are not capable to manage increased transactions and inventory, integration with different line-of-business systems, and have reporting restrictions. Organizations are also challenged with the logistics of offering solutions that have increased mobility, more scalability, and accessibility in the cloud. With Business Central, one could easily handle their financials, sell smarter, secure and automate their supply chain, optimize their operations, enhance customer service and project performance. Candidates for this examination are functional consultants who execute core app setup procedures for SMEs. They execute and configure the MS Dynamics 365 Business Central application, counting setting up core application functionality and modules and moving data to Business Central. Aspirants have applied understanding to meet user requirements through the Business Central application, counting basic knowledge of sales, financial management, inventory, and purchasing.

This training is designed based on the objectives of the course variant MB-800T00-A.

### **Who should attend?**

A Dynamics 365 Business Central core Functional Consultant is responsible for implementing core application setup processes for small and medium businesses.

### **Prerequisites for this training**
